EXPLORE WITH NATIONAL GEOGRAPHIC-

Because How You See It Matters

For more than 20 years, the unique collaboration between National Geographic and Lindblad Expeditions has defined modern expedition cruising, forging meaningful relationships between people and the planet through transformative travel experiences. Every voyage blends the legendary exploration spirit of National Geographic with Lindblad Expeditions' unmatched 60+ years of expedition heritage.

SMALL SHIPS THAT TAKE YOU FARTHER

With more than 20 expedition and charter vessels accommodating between 16 and 154 guests, the fleet is among the largest and most varied in expedition cruising. Each small ship is specially designed to explore your destination—crafted for comfort, engineered for access and equipped to bring you up close to the remote and the remarkable.

TRAVEL WITH A WORLD-CLASS TEAM

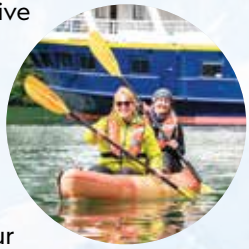

Voyages are led by veteran captains and seasoned guides, with 110+ team members contributing a decade or more of fleet experience.

TAKE GREAT PHOTOS WITH THE PROS

A National Geographic-Lindblad Expeditions certified photo instructor accompanies every departure to help travelers hone their camera skills in captivating places.

EXPLORE YOUR WAY, EVERY DAY

Itineraries feature a range of immersive activities that bring the pages of *National Geographic* magazine to life. All excursions are included unless otherwise noted, and each expedition offers options for every skill level so that you can explore your way—and at your own pace—every day.

LINDBLAD EXPEDITIONS

REVEALING UNDERSEA WONDERS

On most departures, an undersea specialist brings marine wonders to the surface by capturing and sharing underwater footage. During nightly recaps, the specialist interprets fascinating sea creatures and geological features, offering insights integral to the story of your destination.

INSPIRING THE NEXT GENERATION OF EXPLORERS

The National Geographic Explorers-in-Training program nurtures the next generation of global stewards in fun and fascinating places. Led by certified field educators, this hands-on program teaches kids and teens to explore like scientists and tell the stories of their surroundings.

PIONEERING RESPONSIBLE EXPLORATION

The ships in the National Geographic-Lindblad Expeditions fleet are designed to operate efficiently in some of the planet's most remote regions, leveraging nimble design and carefully planned itineraries to reduce environmental impact. Thoughtful choices on board—from eliminating guest-facing single-use plastics to reducing food waste and sourcing locally grown ingredients—help minimize the fleet's footprint while strengthening the communities it visits.

WHAT'S INCLUDED—AND MORE

Everything you need for a complete expedition experience is included—from immersive excursions and engaging talks to meals, alcoholic beverages, onboard amenities, airport transfers, Wi-Fi and more.

To further enhance your journey, we also offer a range of optional customizations for purchase, such as premium alcoholic beverages, spa treatments, additional excursions, photobooks and handcrafted keepsakes—so you can tailor the experience to your preferences. See pg. 22 for details.

A DAY IN THE LIFE

ON EXPEDITION IN ALASKA

Venture far beyond Alaska's busy ports and piers to roadless places where glaciers sparkle, mountains soar and epic wildlife roams. You'll be guided by the rhythms of the wilderness, experiencing it from every angle without another ship in sight.

Breakfast: Savor Your Meal, Soak in a View

Epic scenery is everywhere in Alaska, and at a fjord-side breakfast, you might be treated to views of tumbling waterfalls or electric-blue icebergs as you enjoy fresh bread and pastries, a made-to-order omelet or other delicious dishes from the buffet.

Morning Excursion: Exploring at Water Level

Join a naturalist aboard a Zodiac and speed toward a glistening glacier that peeks through a bend in the fjord. Or board a kayak or paddleboard and glide across these iceberg-studded waters, on the lookout for otters, bald eagles and harbor seals.

Talks and Photo Tips

Head to the lounge for a presentation by your certified photo instructor or another member of your expedition team. Your undersea specialist may reveal footage of the vibrant marine life hidden beneath Alaska's nutrient-rich waters, while naturalists share insights into topics ranging from local orca pods to the area's glaciology.

Lunch: A Fresh Catch

Ship chefs use fresh, local ingredients whenever possible, including locally grown produce and fresh-caught fish. Savor an Alaska-inspired lunch, like a grilled salmon sandwich or a salad featuring wild berries.

Afternoon Excursion: Rainforest Walk

Put your new photo tips to the test during a walk through Tongass National Forest, exploring with our special access permits. Snap pictures as you stroll amid blooming wildflowers, or choose a path less traveled, bushwhacking through thick brush.

Downtime: On Whale Watch

With free time, take advantage of the ship's amenities: Read up on regional flora in the library, visit the open bridge or stand on deck to watch for wildlife. If whales are active nearby, your captain may linger so you can watch their behaviors. When conditions are right, a naturalist drops a hydrophone that lets you listen in on their underwater communications.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's adventures. On select departures, you may be joined by a representative from the Alaska Whale Foundation, who shares fascinating insights into humpback whale behavior and the ongoing research helping to protect these remarkable animals.

Dinner: Crab Feast

A culinary event that always earns rave reviews is the Dungeness crab feast—a mouth-watering taste of Alaska's wild bounty, washed down with local craft beers.

Adventures Under the Midnight Sun

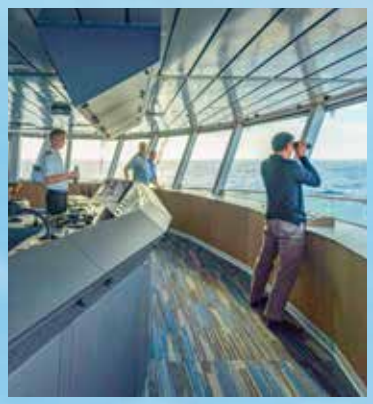

Take advantage of the summer's lingering sunlight to capture golden hour photos or look for wildlife. If you're traveling later in the season, you may have a chance to spot the northern lights painting the night sky.

THE *GREG MORTIMER*

EXPANDING EXPLORATION IN ALASKA

In 2027, *Greg Mortimer* joins the Alaska fleet with three new voyages that expand the ways you can experience one of the world's most extraordinary wild places. Purpose-built for exploration, she pairs the immersive discovery that has long defined our expeditions with thoughtfully designed spaces to relax and connect.

DESIGNED FOR DEEPER DISCOVERY

The 154-guest *Greg Mortimer* combines advanced technology with the intimate small-ship experience at the heart of our voyages. Four rapid-deploy Zodiac platforms maximize your time exploring Alaska's wild coastlines, while expansive observation decks, hydraulic viewing platforms, ocean-view lounges, outdoor hot tubs and a panoramic sauna offer spectacular places to spot wildlife and watch the landscape unfold.

EXPLORATION GUIDED BY EXPERTS

Every voyage aboard the *Greg Mortimer* is guided by the same expertise and operational excellence that have long distinguished National Geographic-Lindblad Expeditions. An exceptional 8:1 guest-to-staff ratio ensures personalized experiences led by veteran expedition leaders, naturalists and cultural specialists. Each Alaska departure also features two certified photo instructors, offering more opportunities for hands-on instruction throughout the voyage.

From Zodiac and kayaking excursions to quiet moments watching icebergs drift by the deck, the *Greg Mortimer* invites you to experience Alaska at a pace that fosters a deeper connection with the landscape, balancing ambitious exploration with welcoming spaces to unwind.

A CLOSER LOOK AT THE *GREG MORTIMER*

With Chief Expedition Officer Trey Byus

Over 33 years at Lindblad Expeditions, Trey Byus has helped shape expeditions from the field to the fleet. Now, as Chief Expedition Officer, he shares why the *Greg Mortimer* is uniquely suited for our newest Alaska adventures.

Q: *Why did you choose* Greg Mortimer *for our new Alaska expeditions?*

A: *Greg Mortimer* gives us the ability to design more ambitious expeditions without compromising the experience our guests expect. We can spend more time exploring and operate longer itineraries while maintaining the flexibility that's central to our expedition philosophy.

Q: *What will feel familiar to past guests?*

A: Everything that matters most. Our veteran expedition leaders, naturalists, cultural specialists and certified photo instructors are what define the experience. The ship is new to the fleet, but guests will be traveling with the same caliber of expedition team—and the same spirit of curiosity and discovery—that they have come to know from National Geographic-Lindblad Expeditions.

Clockwise from top left: Dining room; observation lounge; Captain's Suite.

Q: *What excites you most about these voyages?*

A: They'll reveal even more of Alaska, and beyond to British Columbia—from the immense Hubbard Glacier to Prince Rupert's rich maritime heritage. *Greg Mortimer* gives us the platform to explore these wild places with even greater reach, opening the door to experiences that few travelers ever have.

BUILT FOR AWE

NATIONAL GEOGRAPHIC QUEST & NATIONAL GEOGRAPHIC VENTURE

With the agility and comfort needed to explore Alaska's most remote coasts, the *National Geographic Quest* and the *National Geographic Venture* continue our commitment to immersive expedition travel on this wild frontier.

Purpose-built for navigating Alaska's intricate waterways, the *National Geographic Quest* and her sister ship, the *National Geographic Venture*, bring a modern, clean-lined approach to expedition travel. With 50 cabins and exceptionally nimble design, they can slip into narrow fjords, quiet coves and secluded anchorages, offering access to the region's wildest places.

Twin Zodiac boarding platforms allow for quick disembarkation so you spend less time waiting and more time exploring. Kayaks and paddleboards invite you to discover sheltered inlets at water level, enjoying the up-close encounters with nature that define our explorations here.

On board, outward-facing cabins, expansive windows and tiered viewing platforms keep you connected to your surroundings at every turn—framing sapphire seas, breaching whales and shifting horizons. Amenities include a partially covered sundeck, a fitness center and a welcoming lounge and library with a full-service bar. In the dining room, menus draw on regional ingredients for a fresh, local taste of Alaska's wild bounty—complementing your explorations of this remarkable wilderness.

Above: Spacious dining room with floor-to-ceiling windows; comfortable outdoor space for relaxing and wildlife viewing; Category 3 cabin.

NATIONAL GEOGRAPHIC EXPLORERS-IN-TRAINING

IGNITE THEIR SPIRIT OF DISCOVERY

The exclusive National Geographic Explorers-in-Training program transforms the natural world into a dynamic classroom for young travelers—and it's offered on every Alaska departure. Children and teens learn to explore like scientists through photography, video, drawing and other hands-on activities. National Geographic certified field educators mentor families through shared discoveries, while select kids-only moments build independence and confidence—all within the welcoming spirit of exploration that defines these expeditions.

PROGRAM HIGHLIGHTS

Video Shoots

Young explorers can create their own nature documentaries with help from a certified photo instructor. They'll experiment with slow-motion and time-lapse video as they film everything from soaring eagles and calving glaciers to salmon runs and giant bear tracks.

License to Explore

Kids and teens may learn to operate a Zodiac and get their "driver's license." (Sorry adults, kids only.)

Microscopic Exploration

Young travelers can drop a net over the side of their Zodiac to collect plankton, then check it under a video microscope to see how it looks and moves.

Ice Cream Sundae Glaciers

Using ice cream and toppings, a certified field educator demonstrates how glaciers form, move and melt, showing how these rivers of ice shape Alaska's wild landscapes.

THE SCIENCE BEHIND THE WHALE SIGHTING

For National Geographic Explorer Andy Szabo, every whale encounter tells a story. As Founder and Director of the Alaska Whale Foundation (AWF), he's spent decades uncovering new insights into Alaska's humpback whales—and sharing those discoveries with National Geographic-Lindblad Expeditions guests. Here, Andy reflects on his work and what he hopes every traveler takes away from these extraordinary encounters.

When guests witness a humpback whale breach or bubble-net feed, it's often the moment they'll remember most. My hope is that they also leave with a deeper understanding of the remarkable animals they've encountered and the challenges they face in a changing ocean.

When I began studying humpback whales, I was fascinated by their bahaviors and communications. But after the Pacific marine heatwave from 2014 to 2016, our research took on a new urgency. We began seeing fewer calves, more underweight whales and shifts in where whales were feeding, prompting us to expand our work to better understand the health of both whales and the ocean they depend on.

Support from the Lindblad Expeditions-National Geographic Fund has made this long-term research possible—and it's especially meaningful to share these discoveries with travelers. Every conversation helps connect an extraordinary wildlife encounter to the bigger picture of ocean health and conservation. For me, that's one of the most rewarding parts of the work—and where lasting stewardship begins.

Alaska Whale FOUNDATION

ON BOARD WITH THE ALASKA WHALE FOUNDATION

On select departures, an AWF representative joins the voyage to share insights into area whale research. Guests can also contribute to whale-identification projects that support long-term monitoring and conservation initiatives.
