VOYAGES OF DISCOVERY

2026–2028 VOYAGES

REFRAME TRAVEL

In the modern world, it can seem like every inch of existence has already been explored. To travel with National Geographic-Lindblad Expeditions is to change that point of view—to realize that exploration isn't actually about seeing places that nobody else sees; it's about seeing places differently.

For over two decades, National Geographic and Lindblad Expeditions have collaborated to redefine travel for those who seek unique adventures that inspire awe. Together, they offer more than 100 expedition cruises in over 70 countries across seven continents. Every voyage brings together the legacy of National Geographic, with its long commitment to sharing and protecting world wonders, and the unparalleled expertise of Lindblad Expeditions, with its 60 years of exploration heritage in the planet's remote and wild places.

These are voyages that inspire you to see more, learn more and do more. And when you seek more with National Geographic-Lindblad Expeditions you find it: that change in perspective that changes everything.

EXPERIENCE THE WORLD FROM A NEW PERSPECTIVE

WITH NATIONAL GEOGRAPHIC-LINDBLAD EXPEDITIONS

For decades, the unique collaboration between National Geographic and Lindblad Expeditions has defined modern expedition cruising, forging meaningful relationships between people and the planet through transformative travel experiences. Every voyage blends the legendary exploration spirit of National Geographic with Lindblad Expeditions' unmatched 60 years of expedition heritage.

SMALL SHIPS THAT TAKE YOU FARTHER

With more than 20 small ships, the National Geographic-Lindblad Expeditions fleet is the largest and most versatile in expedition cruising. Each vessel was designed to take you deeper into the planet's most remote places using sustainable fuels and emerging technologies that optimize efficiency. Beautifully designed charters bring you to historic ports and legendary rivers, inviting you to explore them in unique ways.

TAKE GREAT PHOTOS WITH THE PROS

National Geographic photographers have spent decades traveling the globe, capturing the world's most impactful images. They join select expeditions, and a National Geographic-Lindblad Expeditions certified photo instructor joins every departure, helping travelers hone their camera skills in captivating places.

INSPIRING THE NEXT GENERATION OF EXPLORERS

Available in select destinations, the National Geographic Explorers-in-Training program nurtures the next generation of global stewards in fun and fascinating places. Certified field educators help young travelers discover the world like scientists and tell the stories of their wild surroundings

REVEALING UNDERSEA WONDERS

On most departures, an undersea specialist brings your destination's marine wonders to the surface by capturing and sharing underwater footage. During nightly recaps, the specialist interprets sea creatures and geological features, offering insights integral to the story of your destination.

PIONEERING RESPONSIBLE EXPLORATION

Travel with peace of mind knowing the fleet is optimized to limit its environmental impact and that each voyage gives back to protect the natural and cultural heritage of your destination through the Lindblad Expeditions-National Geographic Fund. To date, the fund has invested more than $25 million in projects aimed at preserving the world's oceans, restoring critical marine and coastal habitats and fostering environmental stewardship.

AN ESSENTIAL GUIDE TO EXPEDITION CRUISING

Expedition cruises are driven by the desire to explore fascinating places while enjoying an engaging onboard experience that connects you more deeply with your destination. Here, the leaders in expedition travel answer your questions about what to expect aboard the National Geographic-Lindblad Expeditions fleet.

What is an expedition cruise, and how is it different from a traditional cruise?

A traditional cruise follows a schedule with pre-set excursions. Instead of focusing on the world outside, the ship serves as a floating resort, emphasizing the vacation life on board.

An expedition cruise takes place on a small ship designed to navigate hard-to-reach places, yet prioritizes comfort and well-being. Guests engage in up-close exploration, learning about nature and culture from a dynamic onboard expedition team. The voyage is driven by discovery, with the captain and expedition team members working together to find the most exciting opportunities presented by nature.

Where do expedition cruises sail?

Just about anywhere deep and wide enough to navigate, and far from busy ports and piers—that means small European harbors, narrow Alaska fjords and beyond. Highly seasoned crews seek out lesser-visited shores for an authentic and personal experience.

Learn More

To see the complete list of frequently asked questions from travelers who are new to the fleet, visit expeditions.com/guide

How do you explore on an expedition cruise? What does a typical day look like?

An expedition cruise gives you options to explore your way, and there are often several excursions offered each day. You might start your morning with a Zodiac or kayak outing. After lunch, you could go for a hike, visit a historical site or simply watch for wildlife on deck. During the evening recap, your expedition team will highlight exciting discoveries so you can learn even more about what you saw that day.

Who are your guides on an expedition cruise?

Expedition teams are made up of world-class naturalists, photographers, cultural experts, undersea specialists and others who give context to the places you explore. Each team is curated for the voyage so that you get in-depth perspectives from veteran and locally based guides.

What types of travelers would enjoy an expedition cruise?

Anyone who travels to experience and learn through engaging activities. With daily adventures that are fun for both kids and adults, families are a natural fit. Solo travelers will find a welcoming community on board, and guests of all ages can opt for low-impact or high-energy activities and enjoy a rewarding experience.

LIFE ON BOARD

Each of the more than 20 ships in our fleet tells its own story, shaped by the regions it sails and the people who bring it to life. Designed to reflect a true sense of place, our vessels marry thoughtful design with the spirit of exploration, creating an onboard experience that is as enriching and inspiring as the destinations themselves.

SHIP AMENITIES

Our ships embody the spirit of discovery, blending exploration with elegance. Shared spaces like observation lounges, map rooms and libraries foster community and curiosity, inviting you to connect with fellow travelers and the natural world around you. Aboard select vessels, superior amenities like infinity hot tubs and overnight igloos redefine comfort in the most remote environments.

SAVOR THE FLAVORS OF YOUR DESTINATION

Your ship's executive chef designs unique and innovative menus that feature dishes inspired by the regions you visit. Through partnerships with local farmers, fishers and vintners who share our commitment to sustainability, we bring fresh flavors and authentic stories to your table.

ONBOARD ENRICHMENT

Throughout the voyage, your expedition team will give engaging talks and hands-on photo workshops, sharing the stories of your destination and enriching your connection to the places you explore.

.

CULTURAL CONNECTIONS

The art and music that fill our ships are thoughtfully chosen to bring your destination vividly to life. On select voyages, live performances illuminate regional stories and traditions, while throughout the fleet, artwork and design reflect the cultures and landscapes that shape our journeys.

WELLNESS AT SEA

Find tranquility at sea with our wellness program, designed to refresh the body and renew the mind. While offerings vary, most ships have spa treatment rooms and other dedicated wellness spaces, such as fitness centers, yoga studios and saunas.

Watch Video

All guests aboard *National Geographic Endurance* and *National Geographic Resolution* are invited to experience a special zero-waste tasting menu.

INCLUSIONS AND ENHANCEMENTS

Your voyage is designed to be extraordinary from start to finish, with every detail and inclusion carefully considered to provide exceptional value and meaning wherever you travel. Pricing includes:

- Unlimited activities and excursions.
- Ship-based amenities, such as saunas, hot tubs, fitness studios and libraries.
- Onboard enrichment, including naturalist lectures and exclusive kids programming.
- All meals, including nightly hors d'oeuvres and 24-hour access to snacks.
- Complimentary beer, wine and spirits aboard the expedition fleet and most chartered ships. A selection of super premium wines and liquors is available for purchase.
- Extras to meet your every need, from airport transfers to basic Wi-Fi, park permits and just about anything else you can think of.

To complement this experience, we're also pleased to offer a selection of optional enhancements that let you personalize your journey even further—from curated wine pairings and rejuvenating wellness offerings to premium excursions and handcrafted keepsakes created by artisans in the places we explore. Each is a thoughtful addition—a way to make an already remarkable voyage uniquely your own.

NATIONAL GEOGRAPHIC EXPLORERS-IN-TRAINING

THE NATURAL WORLD, THE ULTIMATE CLASSROOM

Our exclusive National Geographic Explorers-in-Training program transforms the natural world into a dynamic classroom for young travelers. Children and teens learn to explore like scientists and create like storytellers through photography, video, drawing and other hands-on activities. National Geographic-certified field educators mentor families through shared discoveries, while select kids-only moments build independence and confidence—all within the welcoming spirit of exploration that defines our expeditions.

EXPLORATION HIGHLIGHTS

The National Geographic Explorers-in-Training program is available on every departure in Alaska, the Galápagos and Baja California, and on select voyages in Antarctica and Iceland. Discover some of the ways your young explorer can connect more deeply to these wild destinations.

Direct a Nature Documentary in Alaska

With guidance from a certified photo instructor, children and teens can use their smartphones to experiment with slow-motion, time-lapse and other video features. From soaring bald eagles to crashing glaciers and giant bear tracks, every shot becomes part of their unique story of the wild.

Help Track Whales Through Icelandic Waters

Alongside certified field educators, young explorers can spot humpbacks, orcas and other whales from the ship's bow, then upload photos to Happywhale—a global database that identifies whales by their fluke patterns. Their contributions reveal migration routes and deepen their connections to marine life.

Dive Into the Underwater World of Galápagos

On snorkeling excursions, children and teens may encounter foraging sea turtles, playful sea lions, swirling schools of fish, swimming lizards or even penguins. Throughout the voyage, undersea specialists share dive footage and help young travelers identify the species they've seen.

Design the Ultimate Antarctic Survivor

In this hands-on activity, children and teens imagine their own Antarctic creature—combining traits like the blubber of a humpback whale, a leopard seal's teeth, the antifreeze of an icefish or the swimming power of a penguin—to learn how real animals thrive in extreme environments.

Unlock the Hidden World of Plankton in Baja California

Young explorers can board a Zodiac to deploy a special net for a plankton tow. Back on the ship, they'll examine their catch under a microscope, revealing the hidden world of these tiny drifters that sustain whales, fish and countless marine species.

TRAVEL WITH NATIONAL GEOGRAPHIC EXPLORERS

For over a century, National Geographic Explorers have revealed the beauty and wonder of the world through masterful storytelling. From archaeologists and historians to marine biologists, these experts have received grants, fellowships or awards from the National Geographic Society to advance the important work they do in their fields. They travel aboard select departures, sharing insights with guests or using the ships to conduct research as part of the fleet's Visiting Scientist Program.

National Geographic Photographer Kike Calvo instructing a guest on capturing Karukinka National Park in Chilean Patagonia.

David Doubilet, Marine Biologist

A photojournalist focused on oceanic environments, David Doubilet has contributed more than 70 feature stories to *National Geographic* magazine. Doubilet has been called the "Audubon of the Sea" for using photography as a voice for the vanishing ocean. He is currently documenting at-risk UNESCO World Heritage marine sites.

William Saturno, Archaeologist

William Saturno specializes in the myths and histories of early civilizations. A former NASA research scientist, he has conducted fieldwork around the globe—both on the ground and from space—to understand the foundations for great empires of the past, weaving together archaeological, anthropological and historical data.

Natalie Catherine Sinclair, Marine Biologist

Natalie Sinclair is a Scottish marine biologist who conducts animal behavior research and conservation monitoring using non-invasive research technologies, such as bioacoustics. In 2019, Sinclair received a grant from the Lindblad Expeditions-National Geographic Fund to examine the cultural evolution of humpback whale songs in the Cook Islands.

Santiago Ramírez Said, Botanist

Colombian Lebanese botanist Santiago Ramírez Said works on the sustainable development and conservation of Indigenous peoples across the Americas. He collaborates directly with communities in places like Panama and Colombia to protect their cultural practices, storytelling traditions and historical uses of native plants.

Brian Kastl, Ecologist

Dr. Brian Kastl leads aquatic conservation projects across the Pacific, leveraging local knowledge to study fisheries, rivers and reefs. In 2019, the Lindblad Expeditions-National Geographic Fund supported his work to protect endangered coho salmon by tracking their migrations with microchips in the Russian River of California.

GUEST IMPRESSIONS

A LOOK INSIDE THE JOURNEY

A voyage with National Geographic-Lindblad Expeditions stays with you long after you return home. The moments of wonder and connection linger, shaped by the people you meet, the places you explore, and the discoveries that unfold along the way. Here, our guests share the experiences that left a lasting mark.

THE NEWMANS, Baja California

Traveling with: Each other
Number of voyages: 1

"My wife has always dreamed of seeing whales in the wild, so last February I surprised her with a whale-watching expedition in Baja California—it turned out to be the best trip we've ever taken. The thrill was twofold: the whales themselves and the experts on board. Watching the whales spy-hop beside our Zodiac, clearly as curious about us as we were about them, was unforgettable. And the scientists and naturalists were fascinating—I hadn't planned to attend the lectures, but we were the last to leave every night. The trip was exciting and engrossing—amazing in every way."

THE LAURS, Worldwide

Traveling with: Each other and family
Number of voyages: 6

"Some of the perfect '10' moments in my life have been on voyages with National Geographic-Lindblad Expeditions. In the Galápagos, our kids swam with penguins, and a sea lion led them into the surf to play. In Costa Rica, I floated in warm tropical water with scarlet macaws flying overhead, thinking, 'It doesn't get any better than this.' But then I stood among a million penguins in South Georgia, surrounded by the staggering beauty of snow-topped mountains. Each trip somehow tops the last."

THE LAMBRIXES, Galápagos

Traveling with: 15 family members, ages 5 to 75
Number of voyages: 1

"On the first day, we boarded Zodiacs just as the sun was setting. Word spread that a large pod of dolphins had been spotted, and we took off, skimming across the open water. Dozens of dolphins began leaping in pairs beside us—a choreographed dance they all seemed to know by heart. The sunset, the dolphins, the joy on our kids' faces—it felt like the Galápagos was welcoming us, offering a preview of the extraordinary adventure to come.

Beyond that unforgettable beginning, what made the voyage truly special were the people—the crew, naturalists and our fellow travelers, who widened our lens on the world. Our kids loved the National Geographic Explorers-in-Training program, where they weren't just tagging along, but participating as young explorers in their own right. We came home with a deeper sense of connection—to one another and to the incredible people aboard who dedicate their lives to exploration, conservation and education.

RHONDA CHAPIN, Worldwide

Traveling with: Herself
Number of voyages: 20+

"I might be a solo traveler, but I never feel alone on expeditions. The crew makes me feel safe, pampered and welcomed from the moment I step aboard, and before long the other guests feel like family too. I've met so many like-minded travelers—people who care deeply about the environment and exploration. Conversations often start with, 'I think I know you from another trip!' and soon we're sharing stories over dinner or spotting wildlife together from a Zodiac. I've journeyed from the High Arctic to the South Pacific, and on every voyage, the sense of connection stands out most. Traveling solo with National Geographic-Lindblad Expeditions doesn't mean traveling alone—it means being part of a family that spans the world."

GALÁPAGOS

In 1967, Lars-Eric Lindblad led the first-ever expedition cruise to Galápagos for international travelers, ushering in a new era of exploration for the archipelago. That voyage laid the foundation for ecotourism on the islands and initiated a rich tradition of taking travelers deep into an astonishing wildlife sanctuary to discover it from every possible angle.

For decades, National Geographic-Lindblad Expeditions has built relationships in the Galápagos, and today, residents and scientists serve as naturalist guides, guest speakers and hosts for island excursions, providing the most authentic experience possible.

These are voyages born from knowledge gained over nearly 60 years of exploration—and they celebrate every part of this special place, from the wild sea to the stars above and the volcanic landscapes and vibrant communities in between. Whatever experience you seek in the Galápagos, you'll find it aboard a diverse fleet of four expedition ships, where you'll be privy to the best-kept secrets of this world-renowned destination.

A DAY IN GALÁPAGOS

The animals of the Galápagos are unusual, unafraid and overwhelmingly endemic, and observing them with knowledgeable guides is the hallmark of your experience.

Early Start: Rise and Roam

Greet the day on the top deck, practicing sun salutations with a wellness specialist, or head to the bow to look for early-morning wildlife activity alongside expert naturalists. Young travelers in the National Geographic Explorers-in-Training program can begin recording the day's sightings in their official field notebooks.

A Farm-to-Table Breakfast

A fresh breakfast awaits in the dining room: bespoke omelets, a rainbow of fruits and juices, Galápagos-grown coffee and more—much of it sourced from local farms as part of the fleet's pioneering farm-to-table program.

Morning Excursion: Dive In

Snorkel in the Galápagos Marine Reserve, home to an array of captivating creatures: sea lions, technicolor fish, marine iguanas and feeding penguins. Prefer to stay dry? Join a naturalist in a Zodiac or glass-bottom boat for a cruise through a shallow bay to observe marine life at water level.

Talks and Photo Tips

Back on board, join a naturalist or certified photo instructor in the lounge for an engaging talk or a photo tips session. Or head to the fitness center, relax in a hammock on deck or read up on Charles Darwin in the library.

A Local Lunch

Every meal on your voyage is fresh, sustainable and locally sourced—but one lunch stands out: a special Ecuadorian feast, with dishes from the country's coasts, islands and highlands. The golden roast suckling pig from Isla Floreana is a highlight, as is the wild-caught fish in coconut milk.

Afternoon Excursion: Paddle, Hike or Walk

Paddle a kayak or stand-up paddleboard along the coast for a closer look at fascinating volcanic features and textures. Or head ashore with your camera in hand for a wildlife photography walk. Sightings depend on the island—but keep a lookout for blue-footed boobies or waved albatrosses performing their elaborate courtship dances, and flightless cormorants diving for fish.

Sunset Equator Crossing

Head to the observation deck at sunset for a celebratory tasting of local wines as the ship navigates across the equator.

Ready for Recap

Meet in the lounge over drinks and hors d'oeuvres, and settle in for the daily recap, featuring presentations and photo slideshows on the day's adventures and a preview of tomorrow's activities.

Seeing Stars

On clear nights, join your naturalists on the top deck after dinner as the captain switches off the exterior lights to appreciate the magnificent night sky. Being on the equator, you can learn about constellations from both the northern and southern celestial hemispheres, such as the Big Dipper and the Southern Cross.

The Galápagos Islands are filled with endemic species found nowhere else on Earth, and their lack of fear often allows you to observe them at length.

Ongoing offers:
- $500 savings on children under 18.
- 5% savings for groups of 8 or more.
- 10% savings on back-to-back voyages.

See page 58 or visit expeditions.com/offers for details, terms and conditions.

60TH
THE EXPEDITION
THAT STARTED IT ALL

ANTARCTICA

Sculpted by ice and scarcely explored by humans, Antarctica ranks among the planet's greatest travel conquests. In 1966, Lars-Eric Lindblad—the father of Lindblad Expeditions' founder Sven Lindblad—brought the first tourists here, launching expedition cruising on the seventh continent.

As we celebrate 60 years since that pioneering voyage, the same spirit of discovery guides every voyage we take across the Southern Ocean. National Geographic-Lindblad Expeditions sails four powerful polar ships here, each helmed by a veteran "ice master" captain with extensive experience navigating Antarctic waters.

Season after season, expedition teams work diligently to better understand this otherworldly place, seeking out new ice fields and wildlife colonies, mapping safe routes and anchorages and expanding the boundaries for exploration so you can enjoy days filled with adventure.

Embark on the journey of a lifetime with the leaders in Antarctic travel, and make the most out of every precious moment at the bottom of the globe.

A DAY IN ANTARCTICA

Blaze your own trail at the bottom of the globe, discovering kingdoms of sculpted ice and their cold-weather creatures by kayak, Zodiac, on foot and more.

Early Risers: Wake up to Icy Views

Head to the bow or the open Bridge to soak in the icy stillness of the seventh continent before the rest of the ship awakens. You're likely to meet a naturalist who aids in the search for wildlife, including killer whales, humpbacks and wandering albatrosses.

Breakfast at the Bottom of the World

Breakfast awaits in the dining room, where every meal is complemented by panoramic views of Antarctica's volcanic shores. Fuel up with fresh pastries, hot coffee and a sampling of dishes from the buffet.

Morning Excursion: Gear Up for Adventure

Opt for one or several activities at the morning landing site. Climb to the edge of a glistening glacier, then take a leisurely walk to a gentoo penguin colony, where a naturalist interprets each behavior. Kayakers will set off from the ship or shore, paddling amid the iridescent icebergs that float through nature's sculpture garden.

Lunch Is Served

Select from a menu of diverse options that can be tailored to your taste and dietary preferences. Many lunches start with a robust soup to ward off the Antarctic chill.

Talks and Photo Tips

Attend a talk in the lounge by your National Geographic photographer, or take advantage of the ship's amenities: Read up on Ernest Shackleton in the library, test out high-tech cameras and lenses from the complimentary OM System Photo Gear Locker or visit the open Bridge to chat with the captain about the unique challenges of polar navigation.

Afternoon Excursion: Into the Wild

In Antarctica, you'll discover something unexpected daily. In the early season, the captain may disembark travelers on the fast ice so you can walk across the frozen sea. Opt to take the polar plunge, followed by warm blankets and steaming hot chocolate provided by the crew. Young travelers in the National Geographic Explorers-in-Training program may be invited to participate in a plankton tow.

Ready for Recap

Meet in the lounge over drinks and hors d'oeuvres, and settle in for the nightly recap, featuring presentations and slideshows on the day's adventures and a preview of tomorrow's activities.

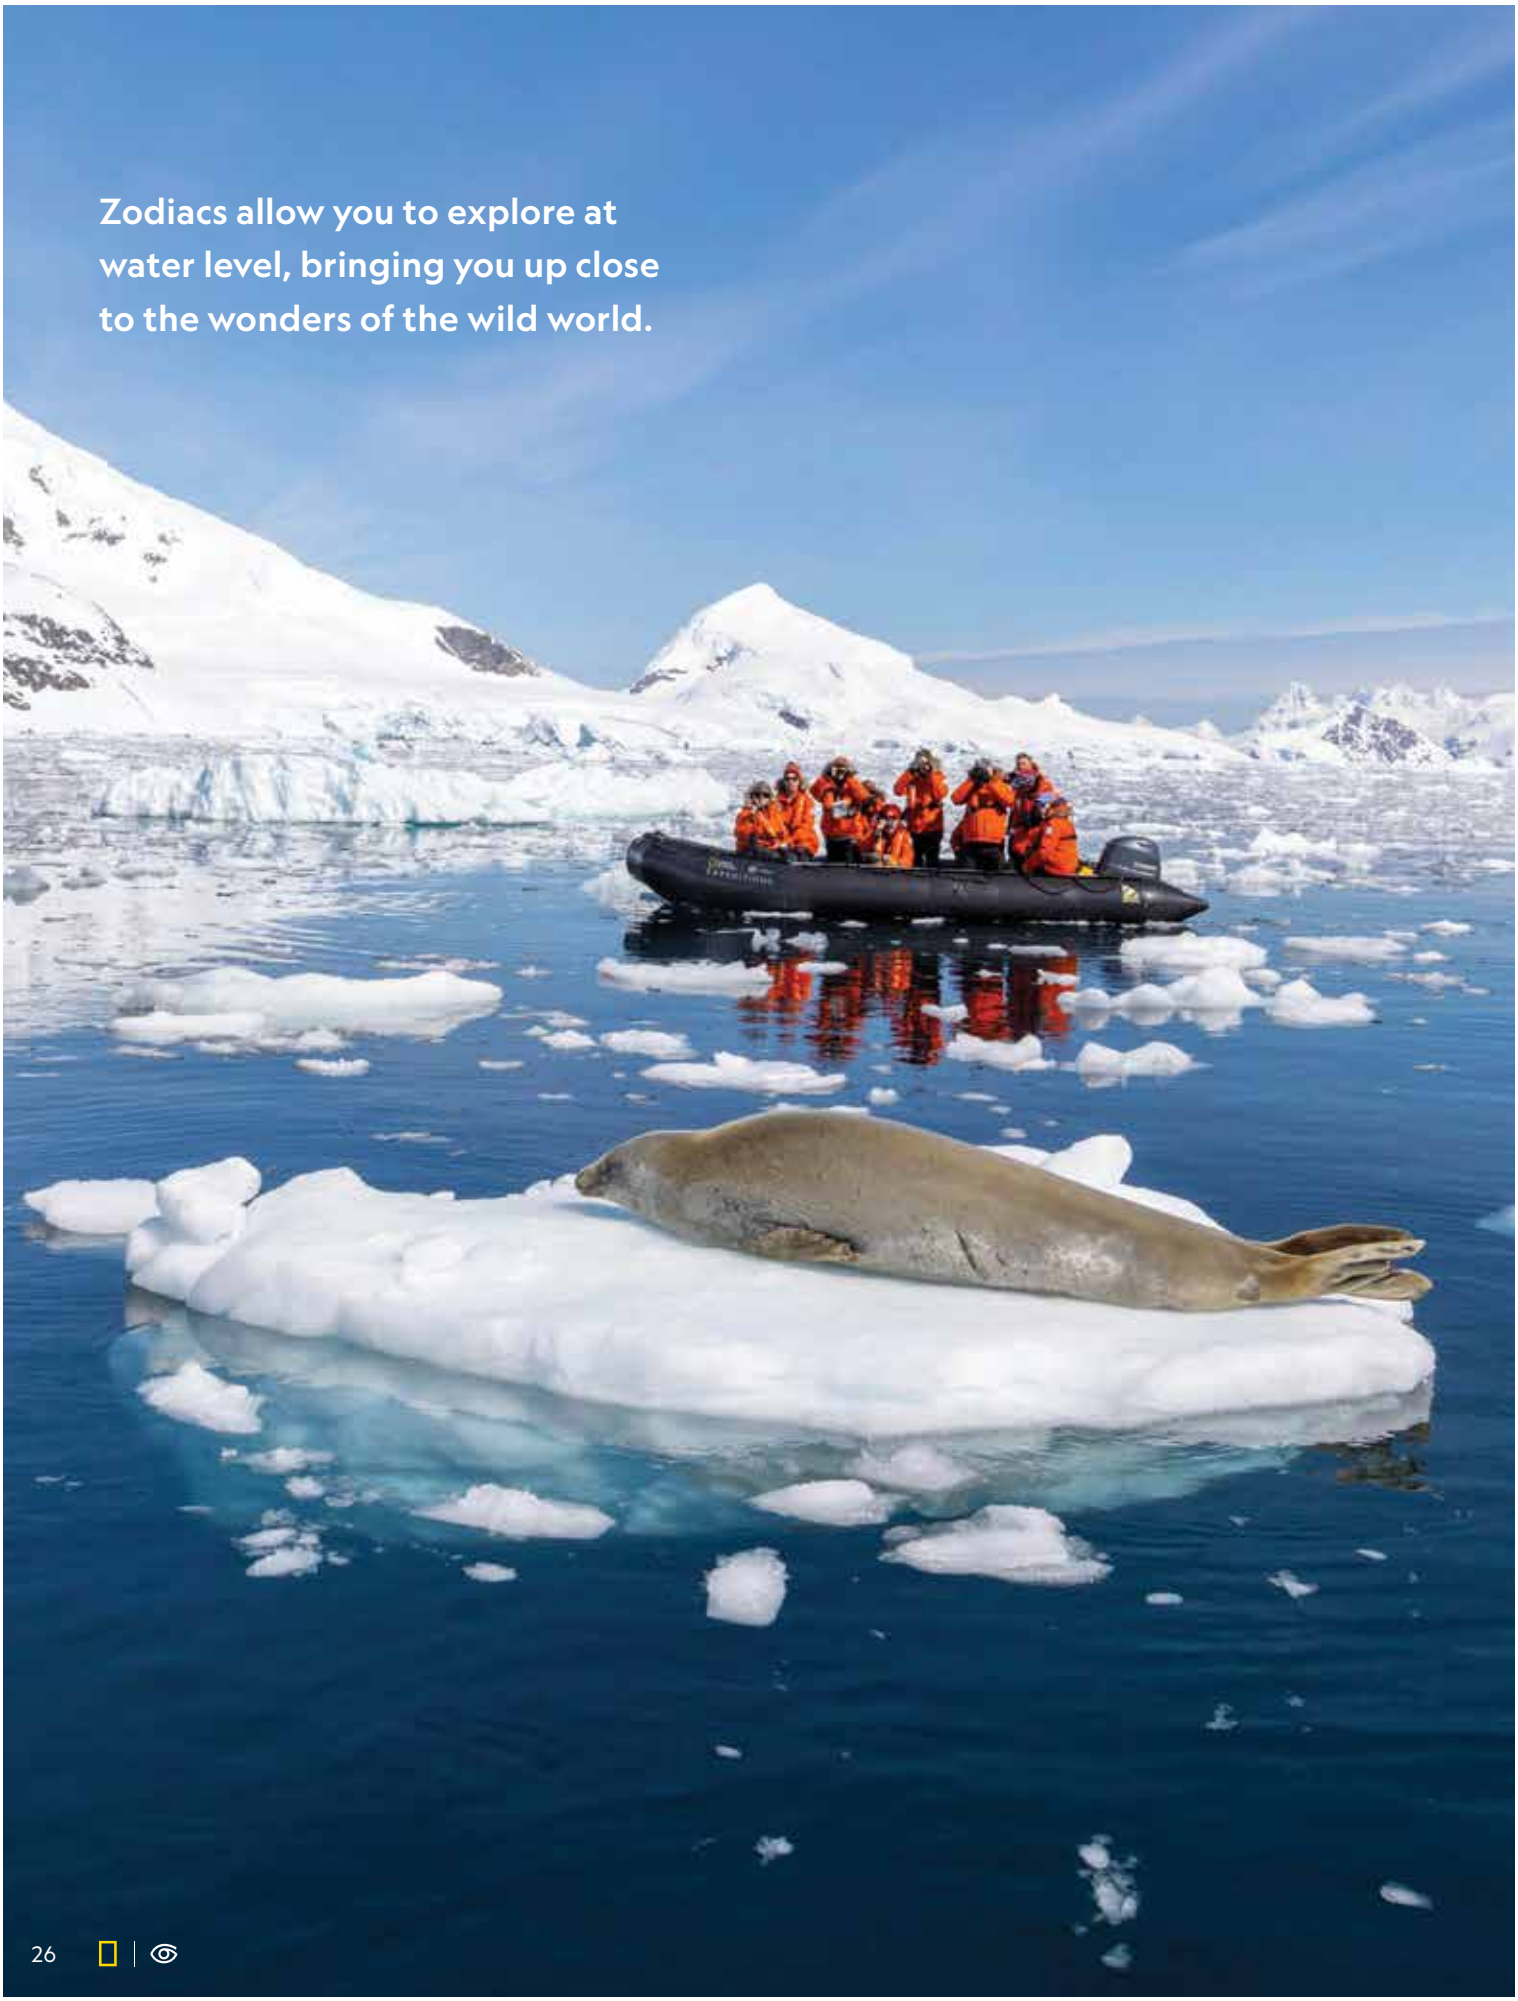

Dinner: Zero-Waste Tasting Menu

Every voyage includes special dining events, such as barbecues or guided wine tastings. Those traveling aboard *National Geographic Endurance* or *National Geographic Resolution* are invited to a special private dinner that features a refined seven-course tasting menu.

Midnight Zodiac Cruise

The evening sun often paints glacial hues in brilliant pinks and the skies a fiery orange. On nights like this, your expedition leader may invite guests for a midnight Zodiac cruise to soak up the spectacular scenery.

Zodiacs allow you to explore at water level, bringing you up close to the wonders of the wild world.

- 5% savings for groups of 8 or more.
- 10% savings on back-to-back voyages.

See page 58 or visit expeditions.com/offers for details, terms and conditions.

ALASKA

More than 40 years ago, Sven Lindblad chartered a floatplane in Southeast Alaska to seek out places only accessible by small ship—the first step in bringing travelers to the wildest parts of America's frontier. Today, millions of people flock to the region each spring and summer to experience its legendary wilderness, but a relative few actually explore it.

Alaska holds the promise of discovery, and National Geographic-Lindblad Expeditions is constantly seeking out new inlets and coves to explore. Each vessel was specially designed to navigate these waters—to take you where larger ships simply can't sail.

Venture far beyond the busy ports and piers to roadless places where glaciers sparkle, mountains soar and epic wildlife roams—bears and bald eagles, harbor seals and humpbacks. You'll be immersed in pure Alaska wilderness, experiencing it from every angle without another ship or soul in sight.

NEW FOR 2027

We're thrilled to introduce the cutting-edge *Greg Mortimer* to our Southeast Alaska fleet. This exceptional charter vessel will bring guests to some of the region's most remote and breathtaking destinations—including the majestic Hubbard Glacier.

A DAY IN ALASKA

Pair four decades' worth of experience with a range of tools for active exploration and you unlock an authentic Alaska adventure.

Breakfast: Savor Your Meal, Soak in a View

Epic scenery is everywhere in Alaska, and at a fjord-side breakfast, you might be treated to views of tumbling waterfalls or electric-blue icebergs as you enjoy fresh bread and pastries, a made-to-order omelet or other hot dishes from the buffet.

Morning Excursion: Exploring at Water Level

Join a naturalist aboard a Zodiac and speed toward a glistening glacier that peeks through a bend in the fjord. Or board a kayak or paddleboard and glide across these iceberg-studded waters, on the lookout for otters, bald eagles and harbor seals.

Talks and Photo Tips

Head to the lounge for a talk on smartphone photography by your certified photo instructor. Stick around for a naturalist presentation on their topic of expertise, such as the dynamics of area orca pods.

Lunch: A Fresh Catch

Ship chefs use fresh, local ingredients whenever possible, including locally grown produce and fresh-caught fish. Savor an Alaska-inspired lunch, like a grilled salmon sandwich or a salad featuring harvested wild berries.

Afternoon Excursion: Rainforest Walk

Put your new photo tips to the test during a walk through Tongass National Forest, the world's largest temperate rainforest. Snap photos as you stroll amid blooming wildflowers, or choose a path less traveled, bushwhacking through thick brush.

Afternoon Talk: Ice Cream Sundae Glaciers

Back on board, young travelers in the National Geographic Explorers-in-Training program have the chance to watch as a naturalist uses ice cream sundaes to demonstrate how glaciers form and change—then they're invited to take a bite out of the delicious display.

Downtime: On Whale Watch

With free time, take advantage of the ship's amenities: read up on regional flora in the library, visit the open Bridge or stand on deck to watch for whales. You may spot humpbacks engaged in a uniquely Alaska behavior: cooperative bubble-net feeding. When conditions are right, a naturalist drops a hydrophone so you can listen in on the whale communications.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's activities. Today's presentation features your undersea specialist, who shares footage from the day's dive of the surprisingly colorful creatures that thrive in these nutrient-rich waters.

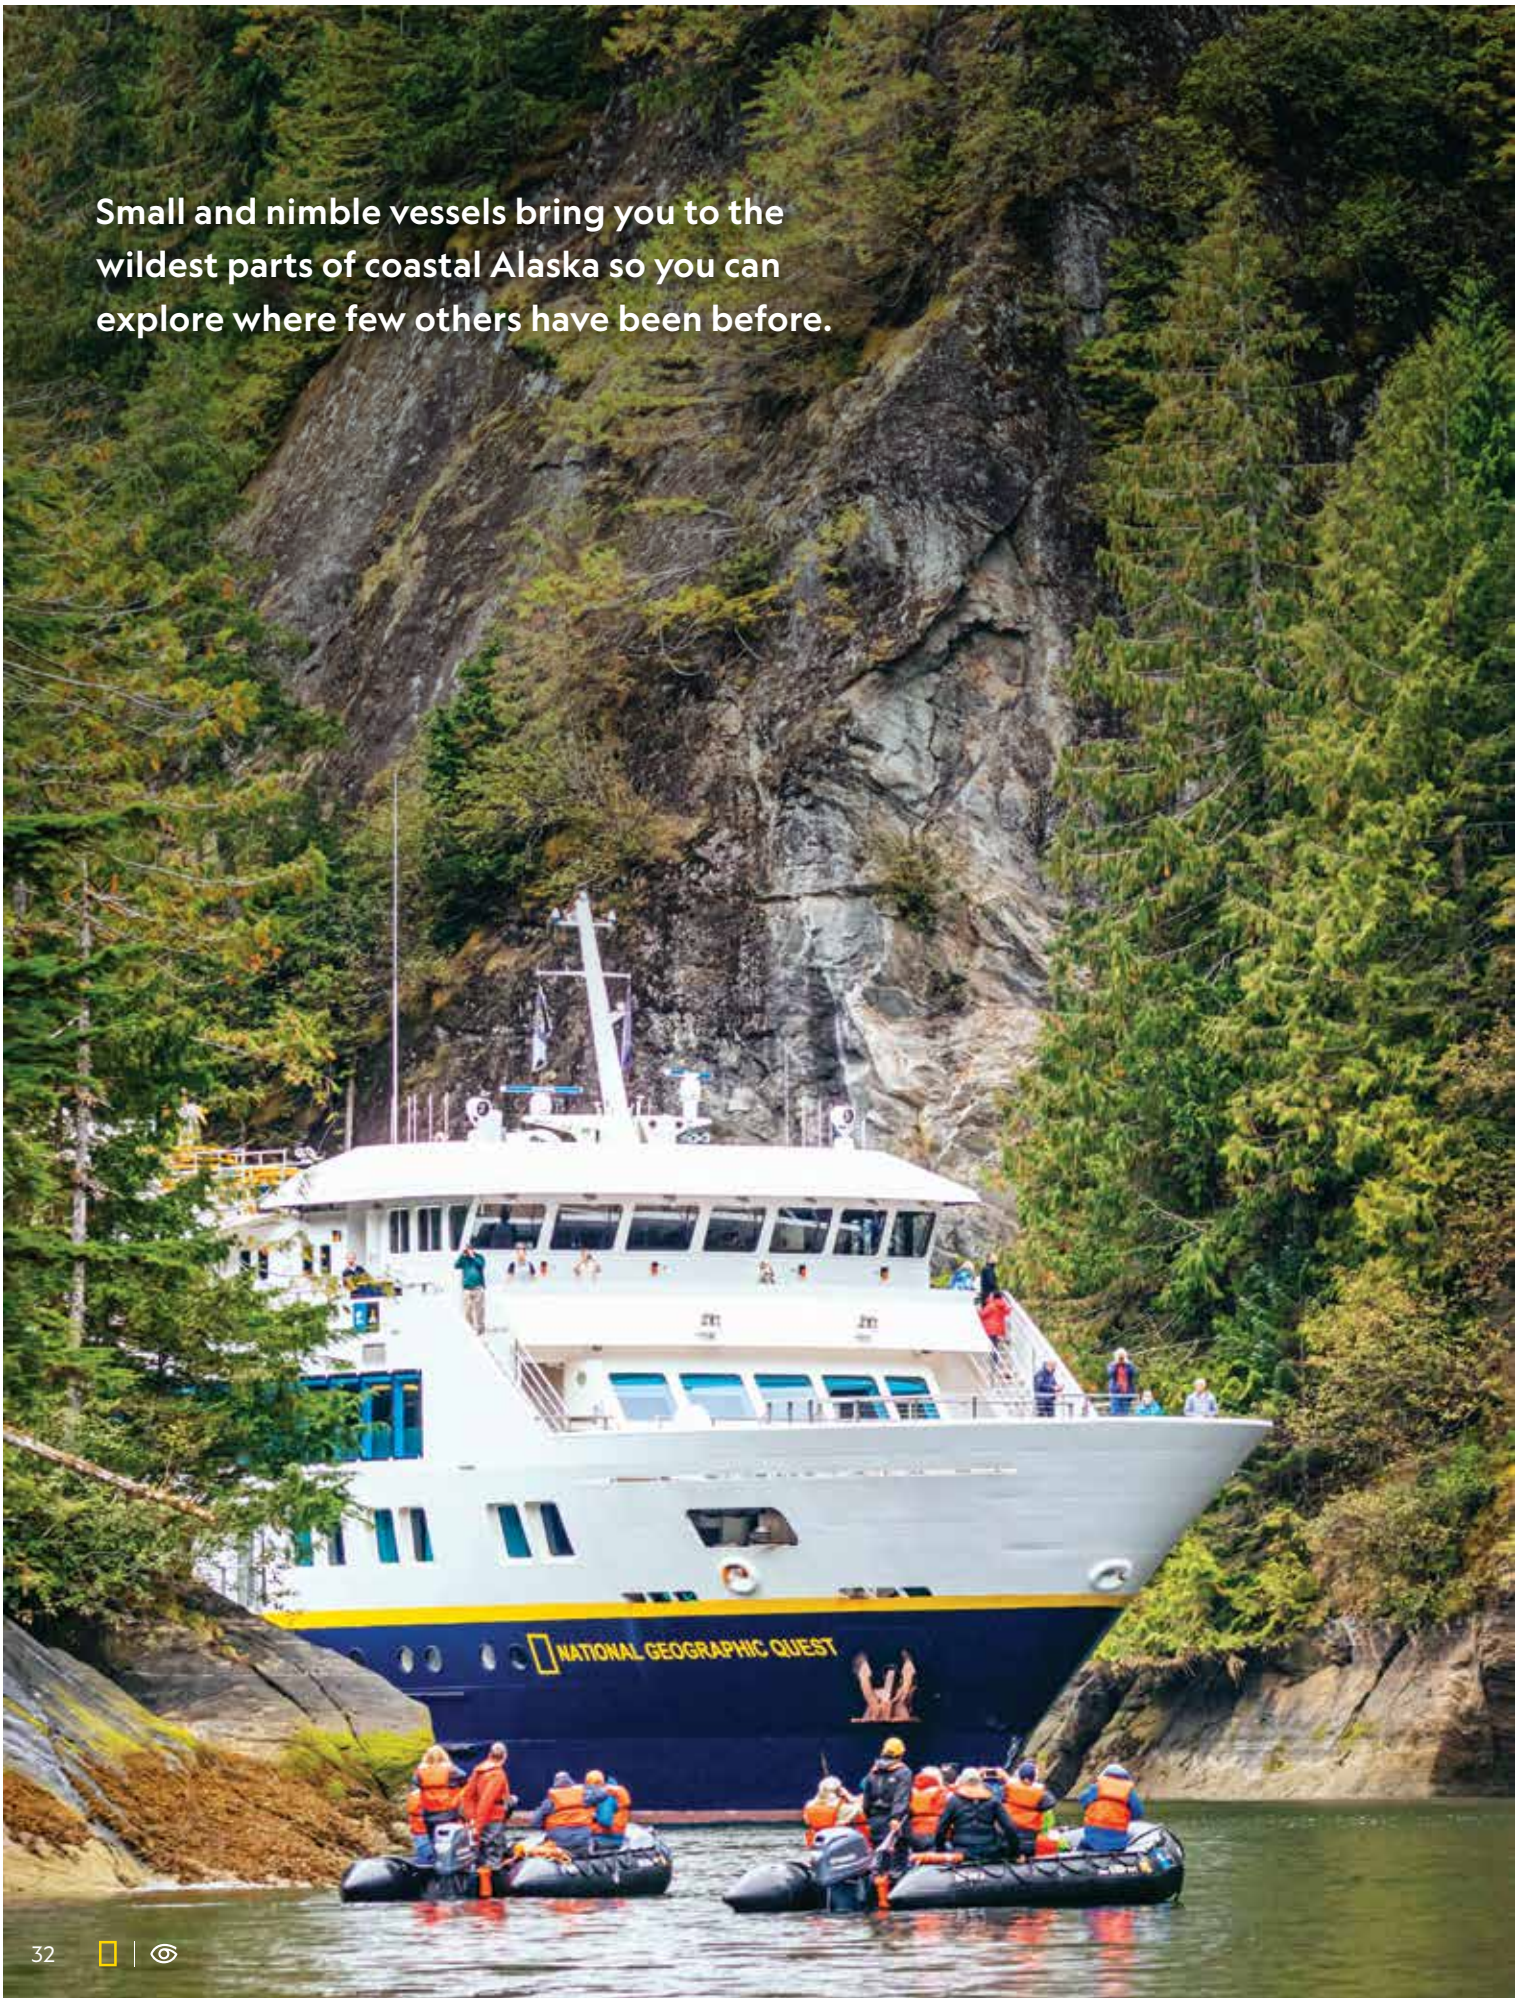

Dinner: Crab Feast

A culinary event that always earns rave reviews is the Dungeness crab feast—a mouth-watering taste of Alaska's wild bounty, washed down with local craft beers.

Adventures Under the Midnight Sun

Take advantage of the summer's lingering sunlight to capture golden hour photos or look for wildlife. If you're traveling later in the season, you may have a chance to spot the northern lights painting the night sky.

Small and nimble vessels bring you to the wildest parts of coastal Alaska so you can explore where few others have been before.

PETREL
EXPEDITION

BAJA CALIFORNIA

Called “the world’s aquarium” by the legendary oceanographer Jacques Cousteau, Baja California is known the world over for its profusion of sea life. Sailing these waters is akin to setting out on a marine safari, where dolphins, humpbacks and gray whales vie for your attention, and snorkeling excursions invite you to witness sea lions and massive swirls of schooling fish.

While the sapphire waters always beckon, the bordering shores and desert isles reveal unexpected wonders—a sculpted volcanic landscape that wears the imprints of time and harbors endemic species found nowhere else on Earth.

More than 45 years ago, Lindblad Expeditions pioneered expedition travel here—a place where the desert meets the sea in captivating contrast. Venture to this unique wilderness that is blissfully remote, yet close to home, and explore it alongside the expert naturalists who know the region best.

A DAY IN BAJA CALIFORNIA

Your expedition is filled with wildlife sightings at sea, and shore excursions to cactus-backed beaches and charming seaside towns.

Early Risers: The Green Flash

With clear desert skies and vast ocean views, Baja California is the ideal place to witness the green flash, a rare optical phenomenon where the sun takes on a greenish tinge just before appearing—or disappearing—over the horizon. Nearly every morning, a naturalist is posted up on the bow, helping travelers catch the exact moment the flash might fill the sky.

Breakfast With Blue Whales

Marine mammals are most active in the morning, and ship spotters work through breakfast so you don't miss a sighting. If they spot a blue whale or other charismatic megafauna, the dining staff happily pauses service for travelers who want to take a look.

Morning Excursion: The World Beneath the Waves

Dive into Baja California's sapphire seas to view its creatures up close, snorkeling with sea lions and schools of jackfish in marine conservation areas. In the sheltered lagoons of the Pacific Coast, more than 20,000 gray whales gather in the winter to give birth and raise their young. Here, you'll board local pangas to observe these curious creatures at water level—one of nature's most spectacular wildlife encounters.

Downtime: Whales, Whales, Everywhere

Every winter, the waters surrounding the Baja California peninsula teem with cetaceans—from fin whales to humpbacks and California grays. Whale watching is always an option during the daylight hours, often turning quiet stretches at sea into some of the most exciting moments of your expedition.

Lunch Is Served

Ship chefs use fresh, local ingredients whenever possible, including sustainably caught fish and desert produce from the Baja California peninsula. Be sure not to miss the fresh ceviche or the fish tacos.

Afternoon Excursion: Exploring Desert Islands

Baja California's desert islands shelter endemic species like the spiny-tailed iguana and the black jackrabbit, plus a surprising array of blooms and succulents. Choose from a variety of naturalist-led activities: Go birding or beachcombing along the sand, hike through an arroyo lined with massive cardón cacti or climb into a kayak or paddleboard for a closer look at coastal cliffs.

Ready for Recap

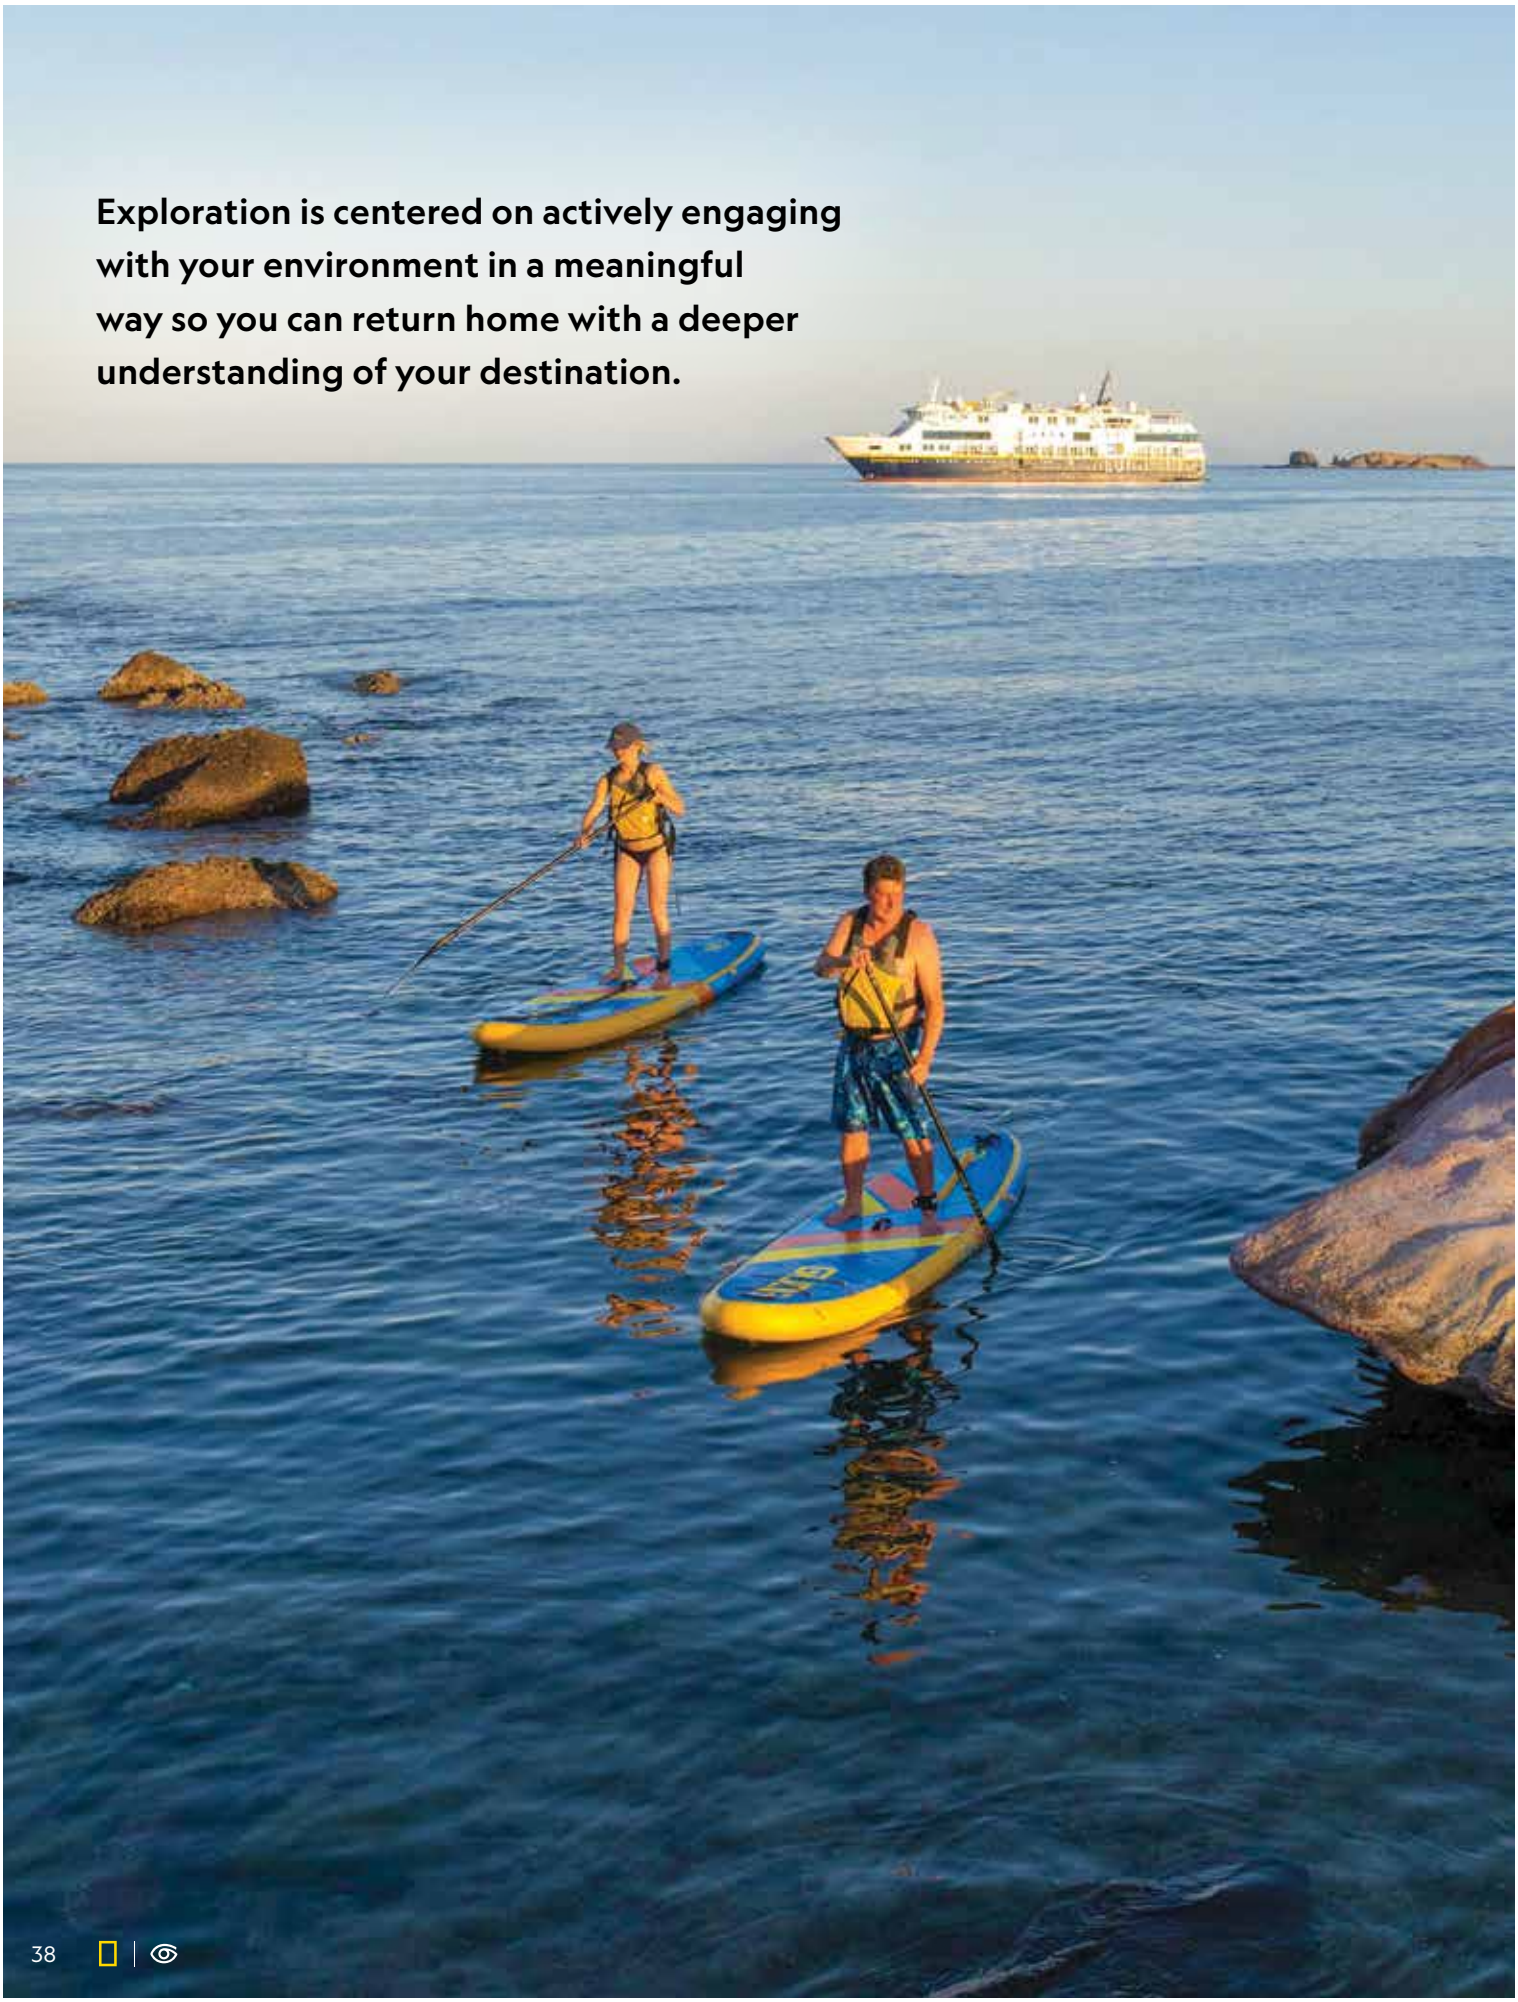

This evening's edition of the daily recap features a presentation from young travelers in the National Geographic Explorers-in-Training program, who link arms across the lounge to demonstrate the enormity of a humpback whale skeleton.

Evening Entertainment: Local Music and Margaritas

Head up to the top deck for happy-hour margaritas and lively tunes from local musicians as Baja California treats you to one of its legendary sunsets.

Exploration is centered on actively engaging with your environment in a meaningful way so you can return home with a deeper understanding of your destination.

BAJA CALIFORNIA EXPEDITIONS AT A GLANCE

National Geographic Venture • 100 Guests

WHEN TO GO

November–April
Mild fall temperatures make for great hiking in the Channel Islands. Come winter, it's all about Baja California. Gray whales arrive in mid-January to raise their calves, and stay through late March.

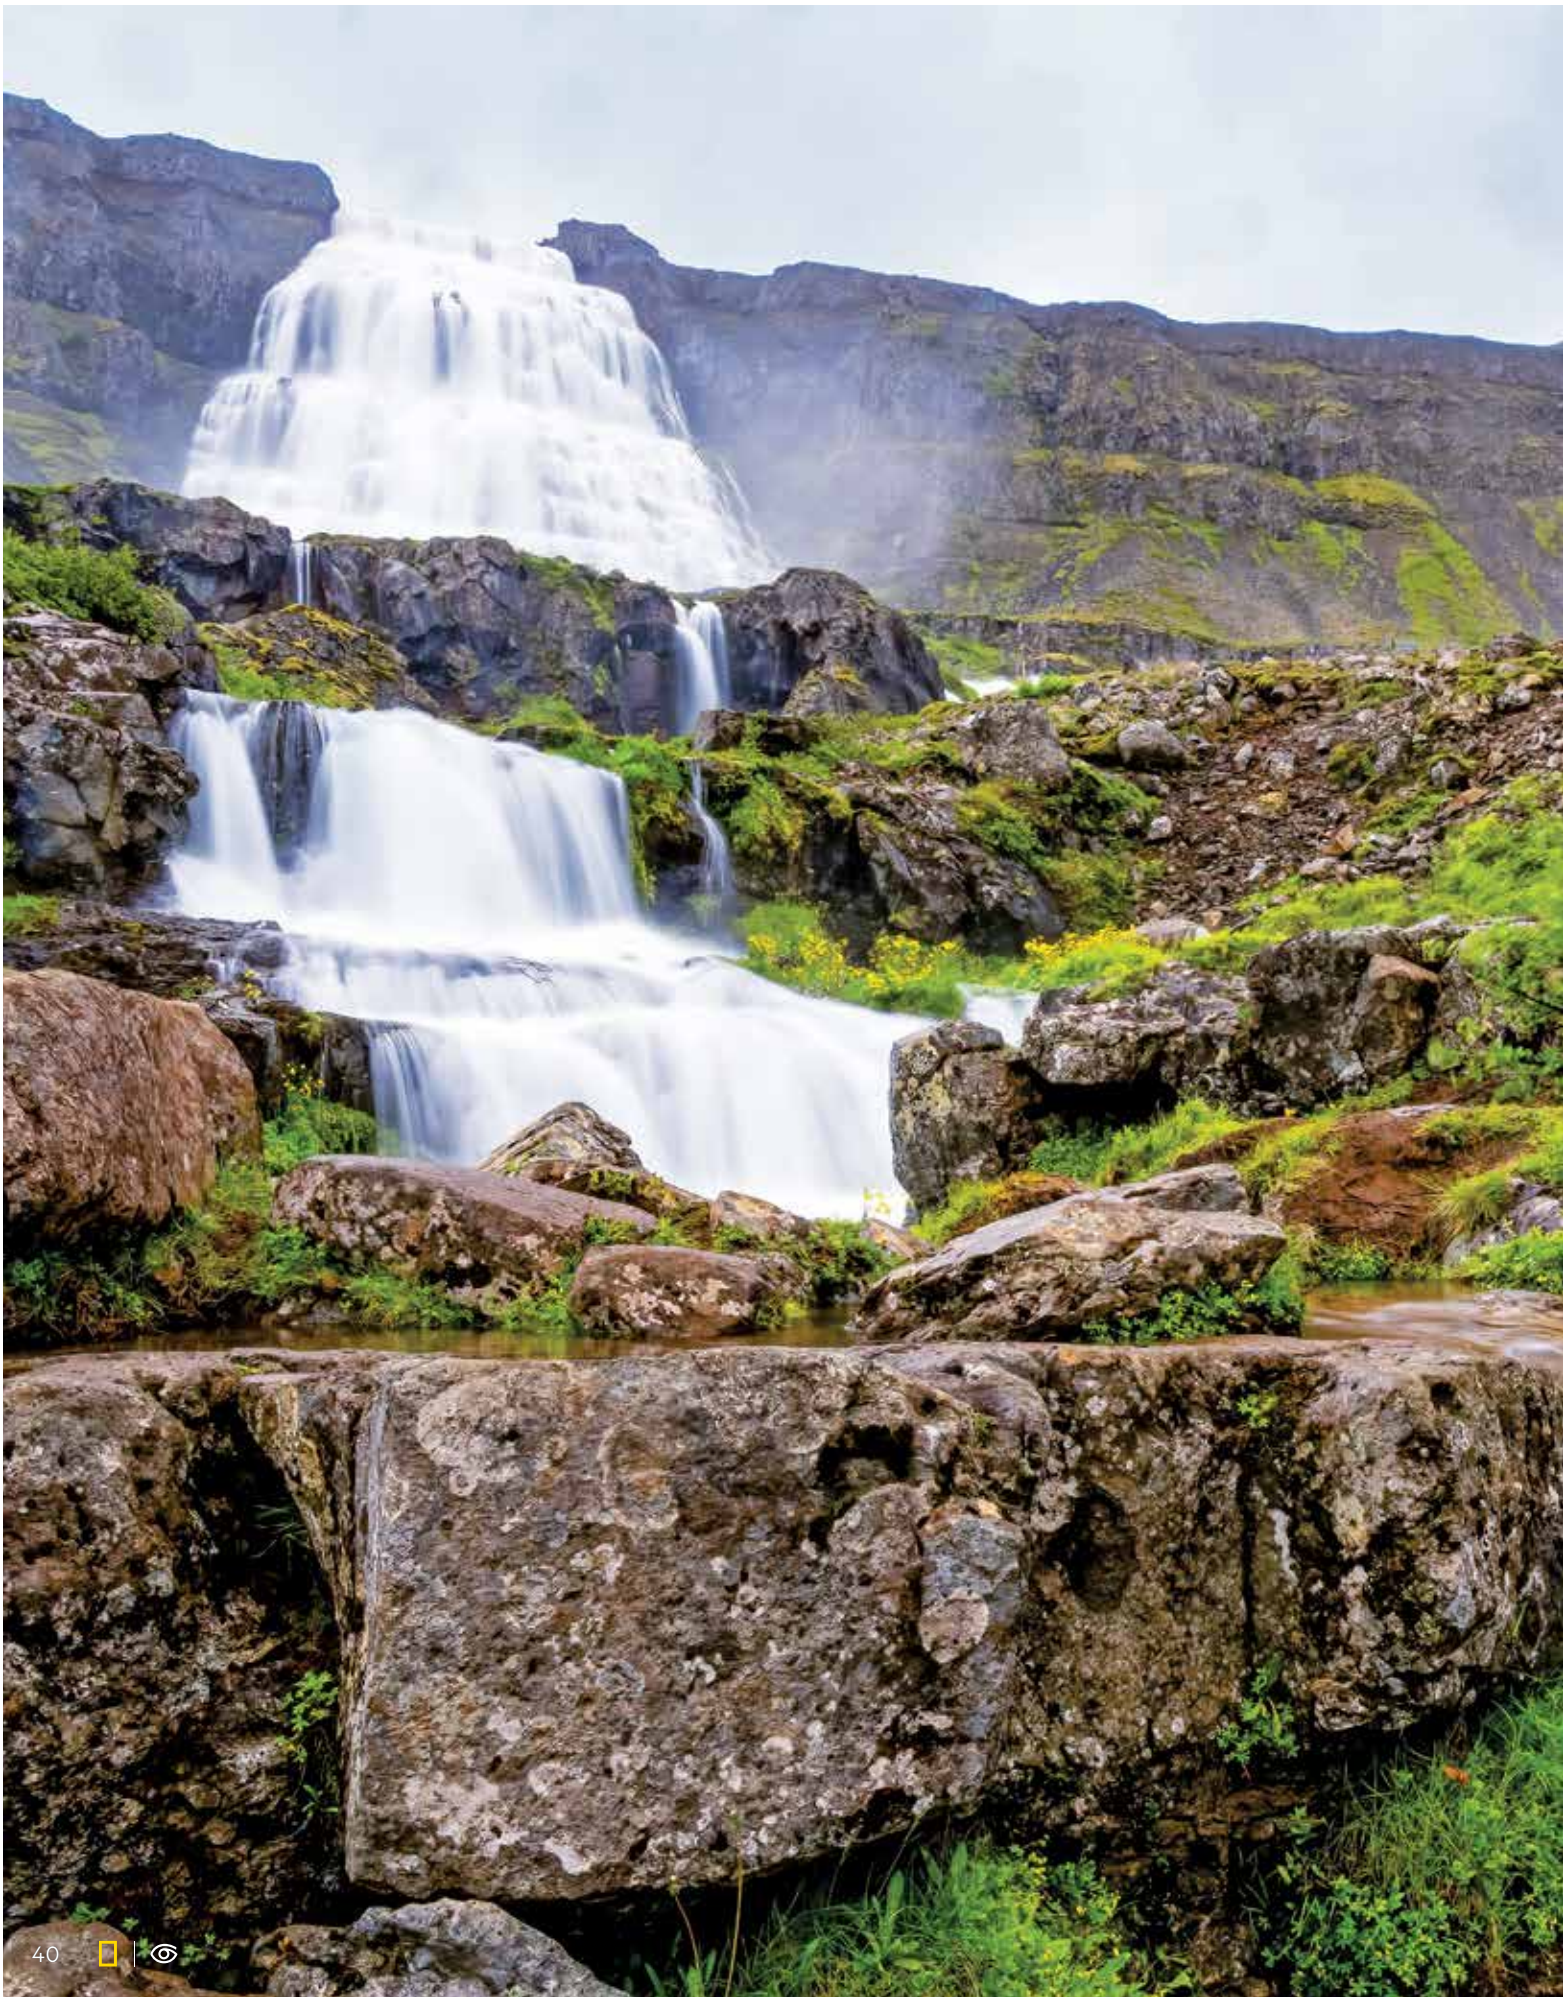

AVAILABLE EXTENSIONS

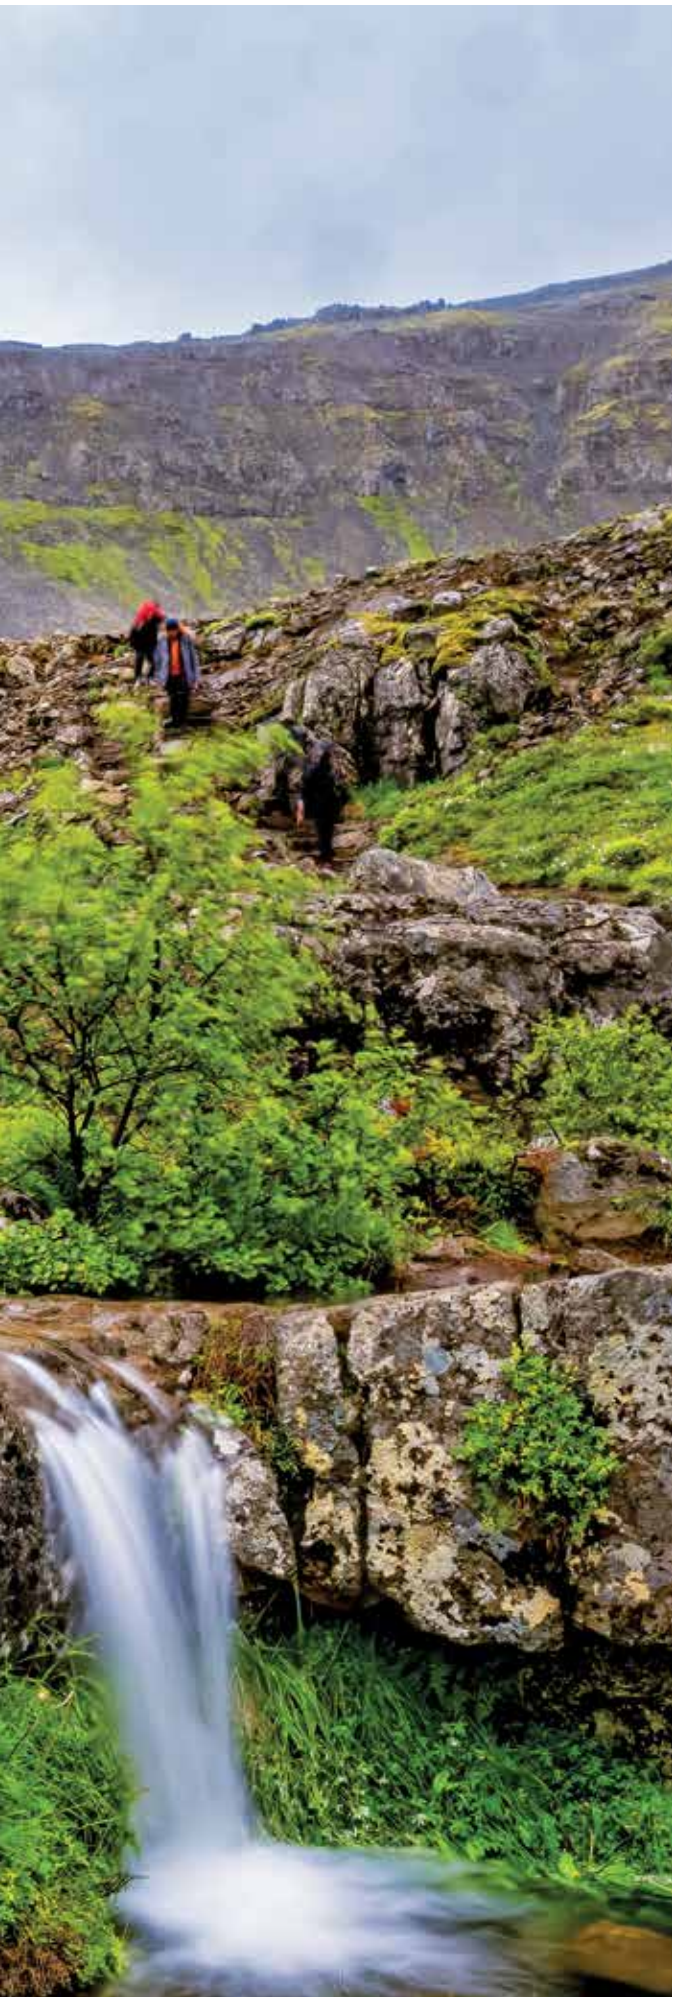

Loreto History and Whale Watching;
Baja California Culture and Cuisine;
Overnight in Loreto

SPECIAL OFFERS

Ongoing offers:
- $500 savings on children under 18.
- 5% savings for groups of 8 or more.
- 10% savings on back-to-back voyages.

See page 58 or visit expeditions.com/offers for details, terms and conditions.

ICELAND

An otherworldly realm that is surprisingly close to home, Iceland showcases the drama of the living Earth like nowhere else. In this land of geological treasures, the brightest gems are found in hidden corners and coves, where waterfalls flow through mossy canyons, glaciers tumble from mountaintops and fjords carve aqueous paths from the sea to timeless fishing villages.

There's no better way to experience authentic Iceland—far from the well-trodden Ring Road—than on an expedition cruise to the country's remote shores. Select Icelandic voyages also venture to Greenland, revealing two striking visions of the Arctic in one epic journey: one landscape alive with volcanic energy, the other sculpted by ancient ice. With National Geographic-Lindblad Expeditions, you'll explore wide-open wilderness across both countries, guided by naturalists who illuminate the dynamic forces that define the far north.

A DAY IN ICELAND

Go beyond the Blue Lagoon to discover the centuries-old hamlets of ancient seafarers, hidden forests shrouded in lore, personality-packed puffin colonies and much more.

Breakfast: Feast Your Eyes on a Fjord

Iceland's rocky coast is carved with more than 100 fjords, many of them found along the country's remote western and eastern shores. After leaving Reykjavík, you'll wake up in a new one nearly every day—and they make the perfect backdrop for a breakfast of made-to-order eggs, fresh pastries and oatmeal and yogurt parfaits with all the fixings.

Morning Excursion: Witness the Earth in Action

Amid Iceland's elemental landscapes, there are a multitude of ways to interact with the living Earth. On a morning excursion, you might walk along a fjord to a thundering waterfall, Zodiac cruise around basalt cliffs studded with seabirds or climb to the rim of a volcanic crater.

Downtime: Scenery at Sea

There's plenty to see from the ship, and while you're relaxing, you may hear your expedition leader call out notable landmarks over the loudspeaker. Among them are Surtsey—one of the world's youngest islands—and the monument on Grímsey island that marks the border of the Arctic Circle. Whales are also plentiful in these parts, and your captain may stop the ship to watch a pod of orcas, humpbacks or fin whales.

Lunch Is Served

Select from a lunch menu of diverse options that can be tailored to your taste and dietary preferences. Many meals start with a robust soup to ward off the Icelandic chill.

Chat With the Captain

Attend a naturalist talk in the lounge or take advantage of the ship's amenities: Read up on geology in the library, test out high-tech cameras from the complimentary OM System Photo Gear Locker or visit the open Bridge to chat with the captain about Arctic navigation. Young travelers in the National Geographic Explorers-in-Training program are invited to join their certified field educator in using the ship microscopes to examine plankton gathered on the morning Zodiac cruise.

Afternoon Excursion: Local Icelandic Life

Voyages offer a rare look at the age-old customs that thrive in the country's remote rural corners. Alongside local Icelanders, delve into traditions like eiderdown processing and herring fishing. Your expedition may also feature a special cultural expert—such as a professor or politician—who joins you throughout the journey to share insights into local Icelandic life.

More to Explore: Get the Perfect Puffin Photo

Several landing sites harbor puffins,* and when you spend time at the edge of their nesting cliffs, keeping as still as possible, they get used to your presence and flutter about their business. Post up alongside your National Geographic photographer and they'll show you how to adjust your shutter speed to get the perfect picture.

Ready for Recap

Meet in the lounge over drinks and hors d'oeuvres, and settle in for recap, featuring presentations and slideshows on the day's adventures and a preview of tomorrow's activities.

Dinner and a Show

Nosh on Nordic cuisine at dinner, sampling a local fish sustainably caught and perfectly prepared by your ship's chef. This evening's entertainment features a local musician hand-selected by the fleet's ethnomusicologist, Jacob Edgar, who curates unique performances that incorporate traditional elements of Icelandic culture.

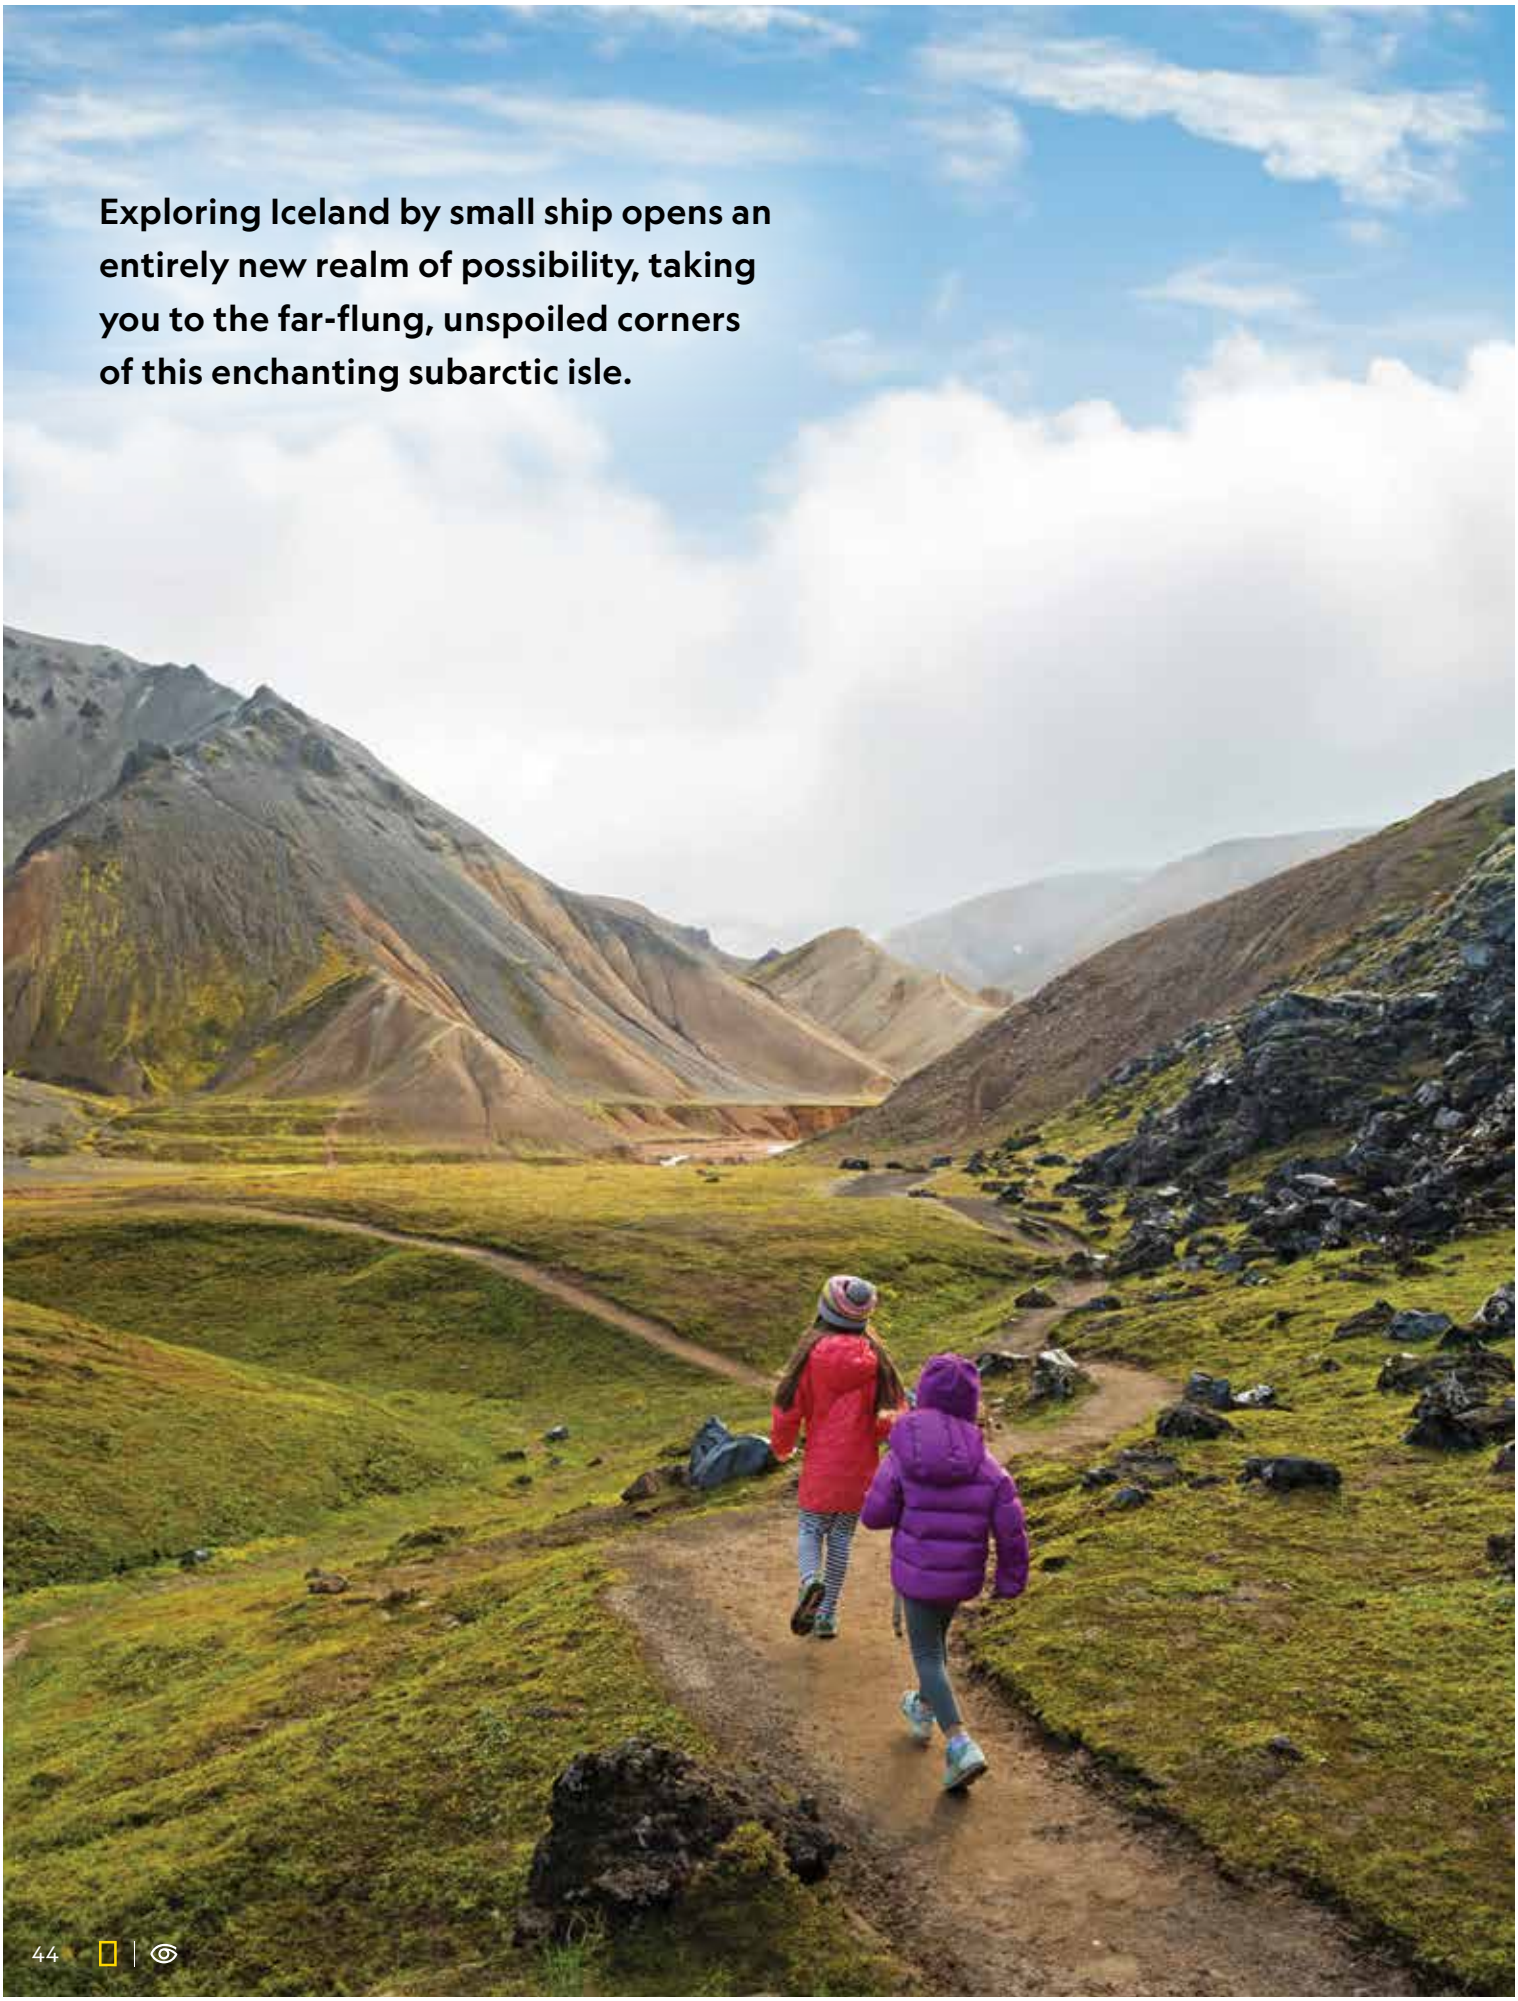

*Puffins can be seen in Iceland between mid-April and mid-August.

Exploring Iceland by small ship opens an entirely new realm of possibility, taking you to the far-flung, unspoiled corners of this enchanting subarctic isle.

WHEN TO GO

April–September
Snow melts into rushing waterfalls in springtime. Puffins arrive in mid-April and stay until mid-August, and whales swim here in the summer. September's diminishing daylight means more chances to spot the northern lights.

AVAILABLE EXTENSIONS

Reykjavik's Golden Circle and Blue Lagoon;
2026 Eclipse

SPECIAL OFFERS

Ongoing offers:
- $500 savings on children under 18.
- 5% savings for groups of 8 or more.
- 10% savings on back-to-back voyages.

See page 58 or visit expeditions.com/offers for details, terms and conditions.

CENTRAL AMERICA

Studded with smoldering volcanoes, carved by falling water and draped in a thousand shades of green, Central America harbors a pristine tropical wilderness that is delightfully close to home. The nimble ships in the National Geographic-Lindblad Expeditions fleet offer new perspectives on the region, taking you deeper into its secret spaces—from empty golden beaches to mangrove forests aflutter with birdlife.

Voyages marry exploration of Central America's epic nature and rich Indigenous cultures. You might spend a day at a thatched Guna village in Panama learning about local artisan traditions, or you may be treated to a folkloric performance in Colombia.

Embark on an expedition to wild isles and tropical shores, where adventure beckons from cliff to cove and passionate experts lead the way to unexpected encounters.

A DAY IN CENTRAL AMERICA

From rainforests aflutter with hummingbirds to reefs swirling with kaleidoscopic fish, Central America bursts with biodiversity—and the fleet brings you to its wildest corners.

Breakfast: Rise and Dine

A fresh breakfast awaits in the dining room: Costa Rican coffee, bespoke omelets, a rainbow of juices and fruits and more—much of it sourced as you sail from local purveyors as part of the fleet's sustainable food program.

Morning Excursion: Choose Your Own Adventure

This morning, opt to set out straight from the ship, discovering a nearby mangrove forest by kayak or paddleboard. Or go ashore for a visit to a local Indigenous village. Delve into local customs and traditions—from the intricately stitched *mola* of Guna Yala to the *sombrero vueltiao* of the Zenú people—and learn about how each community is intertwined with its natural surroundings.

A Local "Blue Zone" Lunch

Ship chefs use fresh, local ingredients whenever possible, including locally grown tropical produce and fresh-caught fish. Try a healthy veggie dish that incorporates the "three sisters"—corn, beans and squash—inspired by the nearby Nicoya Peninsula of Costa Rica, named a "Blue Zone" for the high number of centenarians who live there.

Afternoon Excursion: Underwater Exploration

In the heat of the day, the turquoise waters are calling. Gear up with your dedicated mask and fins, and dive in for a refreshing snorkel. The reefs in Central America teem with multiple species of sea turtles, brightly colored galaxies of tropical fish and other marine life, such as rays, sharks and dolphins.

Explore More: Visit a Renowned Research Station

Since 1932, biologists from across the globe have traveled to Panama's Barro Colorado Island to study its lush lowland tropical forests. On a visit ashore, your travel group is exclusively invited to a talk with members of the Smithsonian Tropical Research Institute's roster of resident scientists. Take a guided walk through the rainforest, on the lookout for three-toed sloths, capybaras and a host of rare and reclusive creatures. Remember to put your eyes on the sky: the canopy here harbors around 400 species of birds.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's activities. This evening you might hear from a naturalist, who shares information on how the health of the ecosystems in Panama impact the Panama Canal.

Dinner Is Served

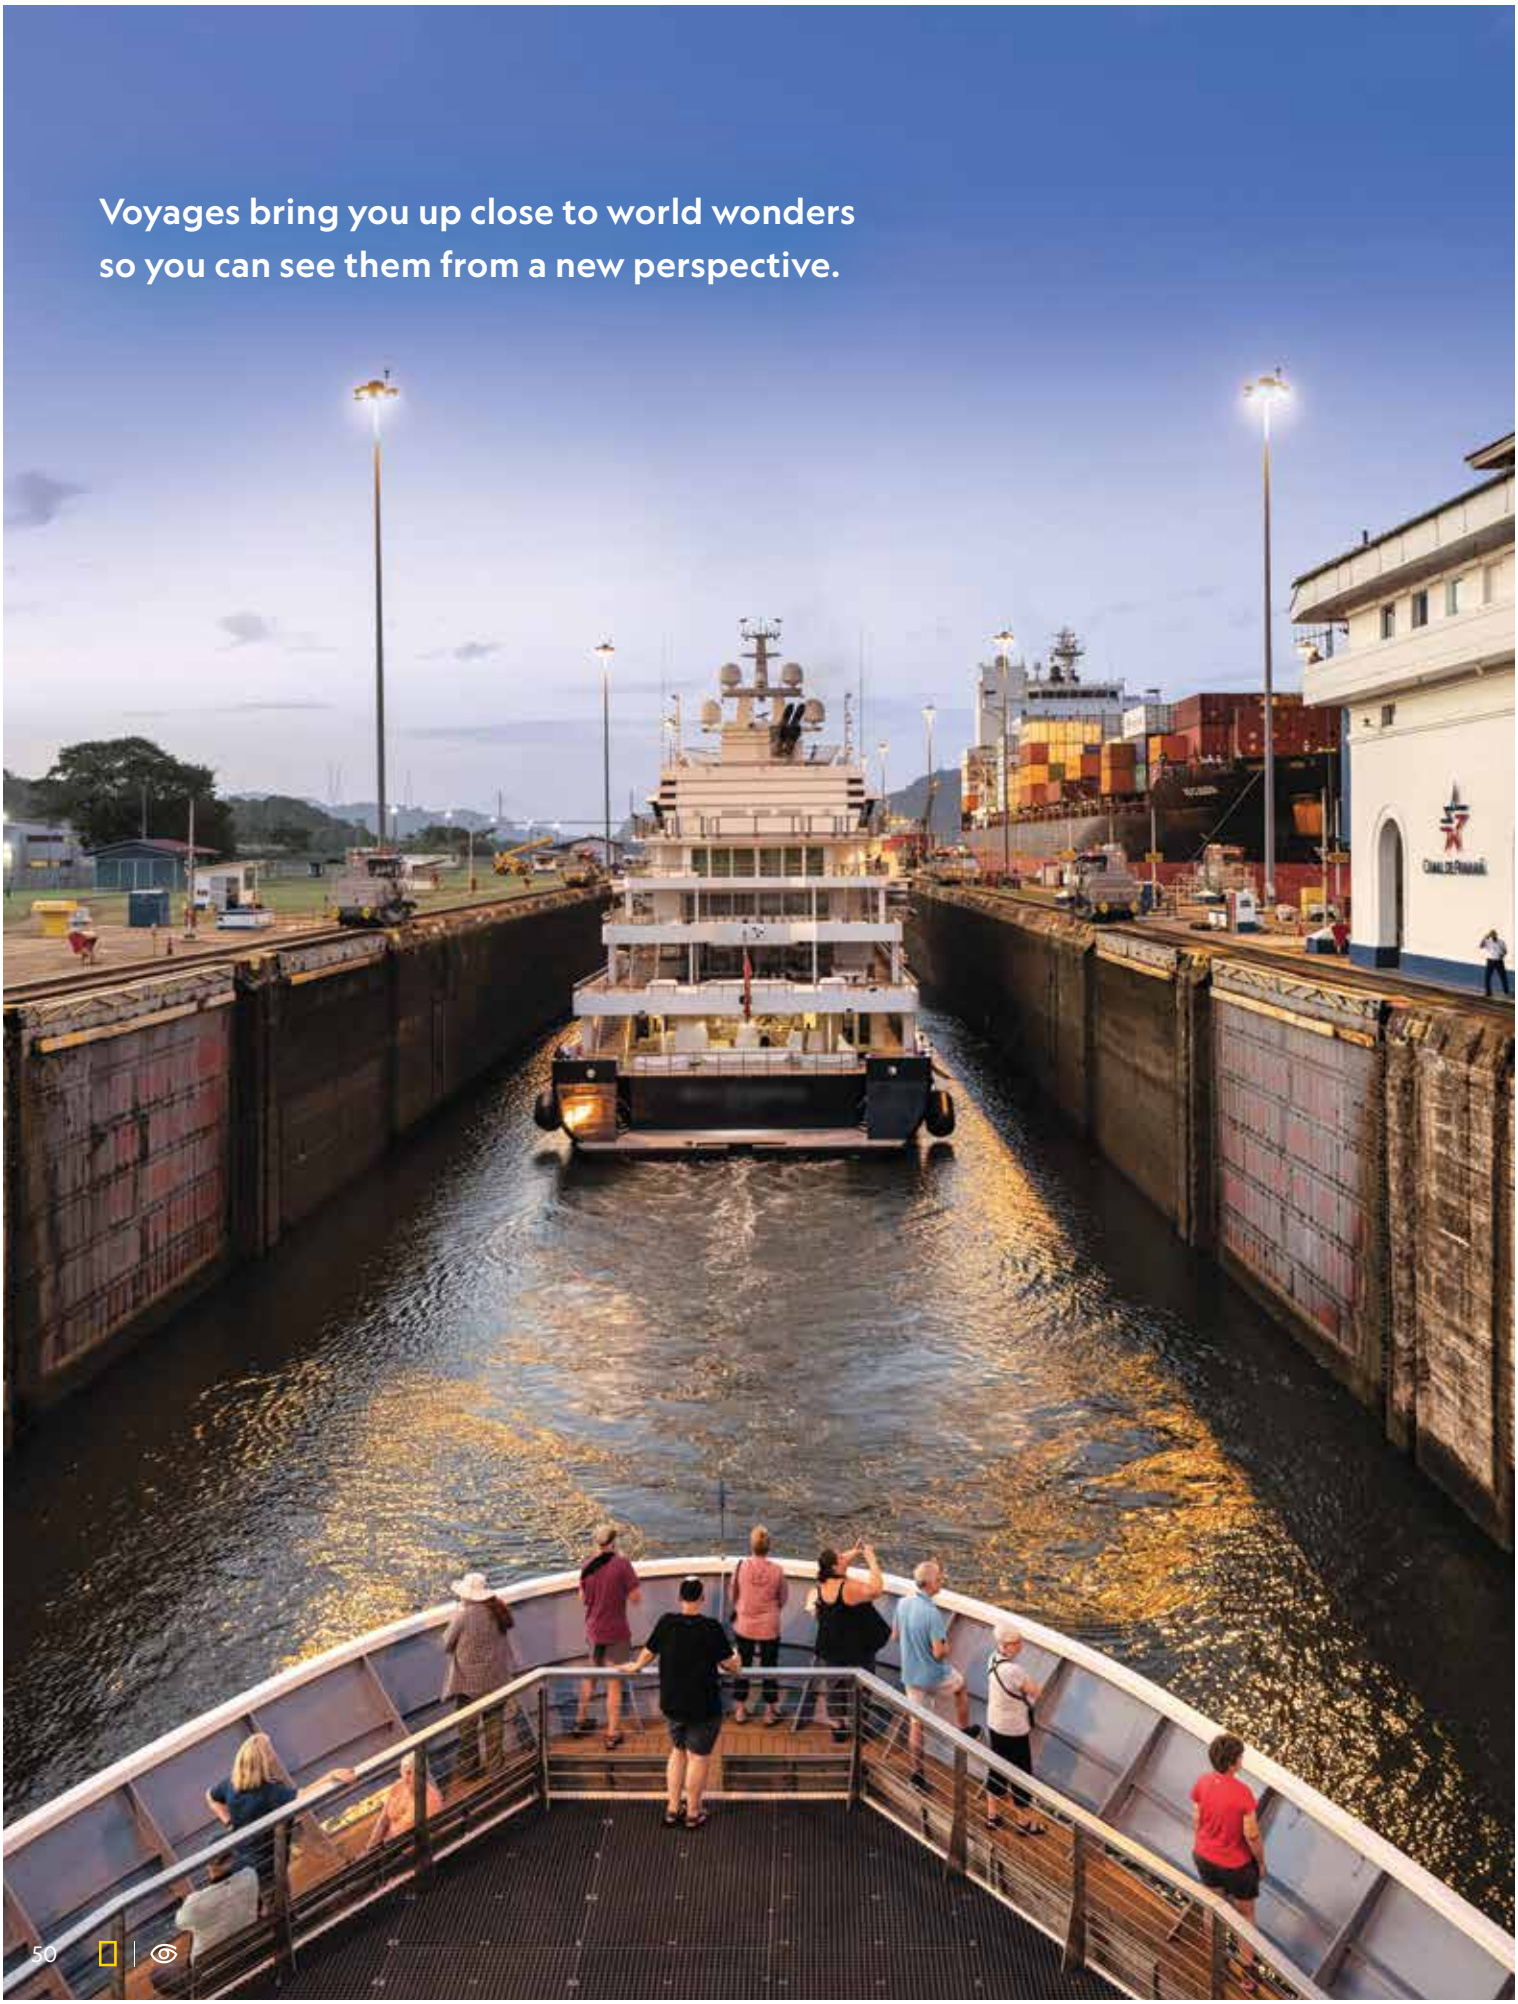

Dine on more Central American specialties this evening, from ceviche and tamales to *rondón*, a seafood stew with a coconut milk base, served with a drizzle of fresh lime and a side of rice.

Evening Entertainment: Panama Canal Crossing

In advance of your Panama Canal crossing, the ship overnights in the Canal Zone, giving you the unique opportunity to spend time on deck taking in the spectacle of the canal's dazzling after-dark illuminations. Tomorrow, you'll sail the locks for a closer look at the intricate workings of this engineering marvel.

Voyages bring you up close to world wonders
so you can see them from a new perspective.

THE NATIONAL GEOGRAPHIC-LINDBLAD EXPEDITIONS FLEET

Meet the fleet of ships that charted a course for expedition cruising, each built small and nimble so you can go deeper into your destination and quickly disembark to spend more time exploring. The vessels are as diverse as their destinations—designed to discover specific geographies and stocked with curated expedition tools to enhance exploration. While their offerings are varied, key features unite the ships: comfortable, well-appointed cabins; lively social spaces that foster community; and capacities that never exceed 154 guests.

GALÁPAGOS SHIPS

Four expedition ships sail the Galápagos year-round, each with a unique style. The purpose-built *National Geographic Endeavour II* and *National Geographic Gemini* embody the type of travel refined during more than 55 years of exploration here, while *National Geographic Islander II* has the spirit and soul of a private yacht. The intimate catamaran *National Geographic Delfina* accommodates just 16 guests in eight spacious staterooms.

CHARTER SHIPS

Certain destinations are best discovered aboard bespoke vessels that evoke the splendor of their historic ports of call. National Geographic-Lindblad Expeditions handpicks ships that are uniquely suited to sail in these special places and fully charters them just for our travel groups.

BLUE WATER SHIPS

Our four blue water ships comfortably sail oceans from pole to pole. *National Geographic Explorer* is the definitive expedition ship, while *National Geographic Orion* provides an intimate travel experience. The state-of-the-art sister ships *National Geographic Endurance* and *National Geographic Resolution* are charting a course for the future of the fleet, with top-tier ice classes and luxurious amenities.

U.S. SHIPS

Two sets of sister ships make up the U.S. fleet: the purpose-built *National Geographic Quest* and *National Geographic Venture* and the intimately scaled *National Geographic Sea Bird* and *National Geographic Sea Lion*. Each has the advantage of being U.S.-flagged, eliminating the need for domestic customs stops and allowing you more time to explore.

*Spirits are not included aboard *Oberoi Philae* and *Sun Goddess*.

†Crew gratuities are additional aboard *National Geographic Endeavour II, National Geographic Islander II, National Geographic Gemini, National Geographic Delfina, National Geographic Quest, National Geographic Venture, National Geographic Sea Bird, National Geographic Sea Lion, Delfin II and Delfin III*.

‡Basic Wi-Fi plan aboard the National Geographic-Lindblad Expeditions fleet, with services provided by Speedcast and Starlink. Complimentary Wi-Fi from other service providers available aboard *Sea Cloud II* (10GB per person), *Oberoi Philae, Sun Goddess, Lord of the Glens, The Jahan, Delfin II, Delfin III, Aqua Blu, Connect, Evolve, Greg Mortimer,* and *Charaidew II*.

Not Included: Airfare (except flights when indicated as included and/or as required); charter airfare (where applicable, except when indicated as included and/or as required); pre- and post-expedition extensions (except flights when indicated as included); additional hotel nights (except when indicated as included); spirits (aboard *Oberoi Philae* and *Sun Goddess*); crew gratuities (except when indicated as included); private transfers (except when indicated as included); enhanced and premium Wi-Fi plans aboard expedition fleet; laundry, spa treatments, scuba diving and phone services (except when indicated as included); travel protection plans; passport, visa and immigration fees. For select voyages, completing a medical evaluation form with VIKAND is required. If you utilize your physician, VIKAND's processing fee for your documentation which will be added to your National Geographic-Lindblad Expeditions invoice. If you utilize VIKAND's physicians, an additional charge will be due to VIKAND directly.

Itinerary Modifications: Itinerary routing may vary and stops may be subject to modification and/or permitting. Visit website itinerary pages for details and exceptions.

Airfare: For all programs, airfare is an additional cost unless otherwise indicated. National Geographic-Lindblad Expeditions will gladly assist in making your air arrangements for a $50 per person service fee.

Reservations, Deposits, and Final Payments: To reserve your place, an advance payment deposit is required at the time of reservation. Receipt of advance payment deposit indicates your acceptance of the terms and conditions. Final payment schedule can be found online. Visit expeditions.com/terms for complete details about deposits and final payment schedules which may vary by ship.

Travel Protection Plan: It is strongly recommended that you take advantage of the Travel Protection Plan. This plan offers comprehensive coverage to protect you from cancellation fees, costs incurred due to trip delays/interruption, medical assistance, and damaged or lost baggage, and provides medical assistance and evacuation during your travels. The Travel Protection Plan is available for U.S. residents only and may be purchased any time prior to final payment due date. If you are not satisfied for any reason, you may return your plan within 10 days after purchase. Your premium will be refunded if canceled within 10 days, provided you have not already departed on the trip or filed a claim. When so returned, the coverage under the plan is void from the original date of purchase.

Responsibility and Other Terms & Conditions: Certain provisions concerning, among other things, limitations of Lindblad Expeditions' and National Geographic Expeditions' (a division of National Geographic Partners, LLC) liability for loss of property, injury, illness, or death during the voyage will be provided to all guests on the ship's ticket sent prior to departure, and are also available on the website at expeditions.com/ terms, or upon request. By registering for a trip, the guest agrees to all such terms and conditions.

This institution is an equal opportunity provider.

Cancellation Policy: Call for details or visit expeditions.com/cancellation-policy. Lindblad Expeditions, LLC is a registered member of the CA Seller of Travel Program #2151120. Registration as a seller of travel does not constitute approval by the State of California. WA Seller of Travel Program #601134845 001 0001.
